THIS DOCUMENT IS SOLELY FOR THE USE OF THE PERSON WHO RECEIVED IT FROM OUR COMPANY OR FROM THE ADVISOR TO THE ISSUE OR FROM THE REGISTRAR. THIS DOCUMENT IS NOT TO BE REPRODUCED OR DISTRIBUTED TO ANY OTHER PERSON.**ENFORCEMENT OF CIVIL LIABILITIES**

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “Civil Procedure Code”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

SUMMARY OF DRAFT LETTER OF OFFER

The following is a general summary of the terms of this Issue, and should be read in conjunction with and is qualified by the more detailed information appearing in this Draft Letter of Offer, including the sections titled “*Risk Factors*”, “*The Issue*”, “*Capital Structure*”, “*Objects of the Issue*”, “*Industry Overview*”, “*Our Business*”, “*Outstanding Litigation and Defaults*” and “*Terms of the Issue*” beginning on pages 20, 36, 43, 45, 52, 69, 127 and 137 respectively of this Draft Letter of Offer.

1. Summary of Industry

Global sugar markets are among the most unpredictable and distorted commodity markets thus posing serious challenge for policy makers to effectively deal with the problem of price instability. In addition to demand and supply of sugar, the prices are also influenced by the protectionist policies across the countries and on-going geo-political tension of Ukraine-Russia conflict.

India is the World's leading producer and consumer of sugar, with 18.8 percent of total production and over 16 percent of consumption in TE 2021-22. The sugar sector plays an important role in Indian economy supporting livelihoods of about 50 million sugarcane farmers and generating around 5 lakh direct employment opportunities in sugar mills. In addition, sugar industry creates indirect employment through various ancillary activities relating to transport, trade, and supply of agricultural inputs. As per the National Accounts Statistics the value of sugar output was ₹1,36,158 crore in 2020-21 at current prices, out of which sugarcane crop output value was ₹1,17,270 crore. Around 75 percent of sugarcane produced in India is used by sugar mills to produce sugar and its by-products. As per the Directorate General of Commercial Intelligence & Statistics (DGCIS), exports of sugar have increased from ₹20,669 crore in 2020-21 to ₹34,345 in 2021-22, an impressive growth of 66.2 percent. Though exports have increased significantly during the last two years due to favourable trade environment, sustaining this growth momentum in future would be a big challenge in view of higher production in major sugarcane producing countries like Brazil in 2022-23.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

1. *Our present promoters of the Company are first generation entrepreneurs*

Our present Promoters are first generation entrepreneurs. Their experience in managing and being instrumental in the growth of our Company is limited to the extent of their knowledge and experience and we cannot assure that this will not affect our business growth.

2. *Sugarcane is the principal raw material used for the production of sugar. Any fall in quality or quantity of sugarcane may adversely affect our business operations.*

Our business largely depends on the availability of sugarcane and any shortage of sugarcane may adversely affect our financial condition and business operations. We do not own any land for sugarcane cultivation and we have to procure it from independent farmers. We have been allotted 7600 Acres of land from the government from where we could get the sugarcane produce from the farmers and we purchase all of our sugarcane directly from sugarcane growers societies and independent farmers. Under Indian law, we are bound to purchase all sugarcane grown within our reserved area, irrespective of the prices of sugar and sugarcane. A reserved area will differ for each sugar mill but is subject to a minimum distance of 15 kilometers between any two sugar mills pursuant to Indian law.

For the year ended March 31, 2023 and March 31, 2022 sugarcane comprised of 56.25% and 54.31% of our raw materials costs, respectively. A variety of factors beyond our control may contribute to a shortage of sugarcane in any given harvest period, such as non-availability of good seeds, bad weather conditions, less rainfall etc. If we fail to procure good quality sugarcane, we may not be able to maintain our production and our business, operational and financial results may be adversely affected.

3. *Sugarcane grown within our reserved areas may be sold to other manufacturers instead of us and the farmers are not required to grow sugarcane in that area and may cultivate other crops.*

The government has allotted us a certain area of agricultural land producing sugarcane. We are bound to purchase the sugarcane produce from that reserved area of land. However, it might be possible that sugarcane grown in our reserved areas may-be sold to other sugar manufacturers. In off-peak time, our Company support the farmers to cultivate sugarcane & try to get them from farmers by paying handsome amount. If the farmers are able to sell it at a higher price or better payment terms for sales from other manufacturers then it might be possible that sugarcane will be sold to some other manufacturer & diversion of sugarcane within our reserved areas may reduce supply of the sugarcane available to us and may adversely affect our financial condition and results of operations.

Also, the farmers within reserved areas have no legal or contractual obligation to cultivate sugarcane and may instead grow other crops. Several factors may prompt farmers to grow crops other than sugarcane in our reserved area, including their ability to cultivate more profitable crops and concerns in relation to late payments from sugar manufacturing companies to farmers. This is further elevated in cases where the payment cycles to farmers are disrupted due to low margins. If more farmers within our reserved areas cultivate other crops, or otherwise limit their cultivation of sugarcane, we may have a shortage of raw material. Any reduction in the supply of sugarcane may adversely affect our financial condition and results of operations.

4. *Our Company, Promoters and Group Companies are parties to certain legal proceedings. Any adverse decision in such, proceedings may have a material adverse effect on our business, results of operations and financial condition.*

Our Company, our Promoters and our Group Companies are parties to certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and forums. Mentioned below are the details of the proceedings involving our Company, promoters and our Group Companies as on the date of the Draft letter of offer along with the amount involved, to the extent quantifiable.

5. *Our sugar recovery rates depend on how efficiently we process sugarcane delivered to us.*

High sucrose levels in sugarcane results in better sugar recovery rates. Sucrose levels are the highest immediately after harvesting, and decrease with the passage of time. Specifically, a delay of more than 24 hours in crushing the sugarcane results in a reduction in the sucrose level of such sugarcane, decreasing our sugar recovery rate. Accordingly, our sugar recovery rates depend upon how efficiently we process the sugarcane delivered to us. Any delay in crushing the sugarcane delivered to us, or any adverse change in the expected volume or delivery schedule of sugarcane being delivered to us, results in reduction of sucrose content of the sugarcane supplied to us and as such, adversely affects our results of operations

6. *Adverse weather conditions, crop disease and certain sugarcane crop varieties grown by farmers may adversely affect sugarcane crop yields and sugar recovery rates for any given harvest.*

Our sugar production depends on the volume and sucrose content of the sugarcane that is supplied to us. Crop yields and sucrose content depend primarily on the variety of sugarcane grown and is impacted by any crop disease and weather conditions such as rainfall and temperature, which vary. Adverse weather conditions have caused crop failures and reduced harvests and resulted in volatility in the sugar and industrial alcohol industries and consequently in our operating results. Flood, drought or frost can adversely affect the supply and pricing of the agricultural commodities that we sell and use in our business. For instance, in SS 2016, the yield of our sugarcane reduced due to low levels of rainfall in the state. There can be no assurance that future weather patterns, potential crop disease or the cultivation of certain sugarcane crop varieties will not reduce the amount of sugarcane or sugar that we can recover in any given harvest. Any reduction in the amount of sugar recovered could have a material adverse effect on our results of operations.

7. *Our power generation business is substantially bagasse-based which is derived from sugarcane. Any constraint on the availability of sugarcane may adversely affect our power generation.*

The by-products of sugar production are bagasse and molasses. Our power generation business is primarily bagasse based. Since our access to external supply of raw material is dependent on prevailing sugar cycles, any constraint in the availability of sugarcane may affect the production and availability of bagasse and molasses. This may affect the current or future business of our power generation plants and/or chemical production units / distilleries, and as such adversely affect our financial condition and results of operations.

8. *Our Company has negative cash flows from its operating and its investing activities in the current and past years, details of which are given below. Sustained negative cash flow could impact our growth and business.*

Our Company had negative cash flows from our operating, investing & financing activities in the previous years as per the Restated Financial Statements and the same are summarized as under:

<i>Net Cash Generated from</i>	<i>For the period ended on October 31, 2023 (stub period)</i>	<i>For the year ended on March 31, 2023</i>	<i>For the year ended on March 31, 2022</i>	<i>For the year ended on March 31, 2021</i>
Cash flow from Operating Activities	(278.01)	-2,025.81	862.28	24.21
Cash flow from Investing Activities	25.04	280.07	264.84	(212.32)
Cash flow from Financing Activities	220.16	1,286.10	(826.44)	601.79

9. *Inability to set/control the cost of sugarcane or the selling price of sugar.*

Our profitability depends significantly on the cost of our primary raw material, sugarcane, and the selling price of sugar. We are neither able to set the cost of sugarcane nor the selling price for our sugar. The price we pay for sugarcane is determined by the government of the state of where our mills are located and we may be adversely affected by rising sugarcane prices, particularly in the event of a decrease in the price of sugar.

We purchase all of the sugarcane that we use in our production of sugar directly from the independent sugarcane growers and sugarcane growers' societies located in our reserved areas.

The state government, where all our mills are located, annually declares the sugarcane procurement price which is known as the State Advised Price ("SAP"). The SAP is a minimum price we must pay to sugarcane growers for sugarcane. The determination of the SAP is not related to the prevailing market price of sugar and is only loosely related to the quality of sugarcane. For example, political motives may result in the declaration of higher SAPs. Rising SAPs, particularly if sugar prices remain stable or decrease during the same period, may adversely affect our results of operations and financial condition expected from such loans. Some of our borrowers may be able to find balance transfer options at comparably lower interest rates or other financing alternatives, which could have an adverse effect on our business, results of operations and financial condition.

10. *We operate in the sugar industry where the market price for our products is cyclical, while the price at which we procure our raw materials is regulated. These pricing conditions cause our margins to fluctuate and may affect our financial condition, cash flows and results of operation.*

The sugar industry has historically been cyclical and sensitive to changes in supply and demand. The market in India has experienced periods of limited supply, causing sugar prices and industry profit margins to increase, followed by periods of excess production that result in oversupply, causing declines in sugar prices and industry profit margins. For additional details, please see "Industry" on page 52 of this Placement Document. Fluctuations in demand and supply and as a result, the price of our products, occur for various reasons, including:

- changes in the availability and price of our primary raw material, sugarcane;
- variances in the production capacities of our competitors; and
- the availability of substitutes for the sugar products that we produce

Further, we operate in a seasonal industry in which the crushing season for sugarcane, typically lasts for around six months in a year. This requires us to generate large amounts of working capital during such crushing seasons in order to procure our raw material. Accordingly, the cyclical nature of the sugar industry may cause our margins to fluctuate and adversely affect our cash flows, hampering our ability to finance our working capital requirements in a timely manner or at all. Sugar production in India is currently at low levels as compared to the consumer demand which continues to rise because of population growth, rising income levels, and a shift away from traditional sweeteners such as gur and khandsari to sugar. Stronger demand may result in higher prices for sugar. Profitable sugar manufacturers may make prompt payments to farmers who may in turn switch to cultivating sugarcane rather than other crops which have become relatively less profitable. An increase in sugarcane cultivation may lead to an increase in sugar production and a subsequent reduction in sugar prices, which may materially and adversely affect our results of operation and our financial condition.

11. *The prices we are able to obtain for the sugar that we produce depend largely on prevailing market prices. These market conditions, both domestically and internationally, are beyond our control.*

The wholesale price of sugar has a significant impact on our profits. Like other agricultural commodities, sugar is subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. In addition, a material amount of total worldwide sugar production is traded on commodity exchanges and is thus subject to speculation, which could affect the price of sugar worldwide. Any prolonged decrease in sugar prices could have a material adverse effect on us and our results of operations.

12. *We are exposed to operational and credit risks which may result in NPAs, and we may be unable to control or reduce the level of NPAs in our portfolio.*

Our Company's inability to control the number and value of its NPAs may lead to deterioration of the quality of its loan portfolio and may adversely impact its business. Further, if our customers default in their repayment obligations, our business, results of operations, financial condition and cash flows may be adversely affected of total worldwide sugar production is traded on commodity exchanges and is thus subject to speculation, which could affect the price of sugar worldwide. Any prolonged decrease in sugar prices could have a material adverse effect on us and our results of operations.

- 13. *We have not paid dividend to our equity shareholders during the financial years ended March 31, 2023, March 31, 2022 and March 31, 2021. Our ability to pay dividends in the future will be affected by our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on the earnings, financial condition and capital requirements of our Company. Our business is capital intensive as we are required to innovate from time to time to increase margins, which may result in additional capital expenditure. Further, we may not be able to distribute dividends in certain circumstances such as default in payment of interest and/or principal, amongst others, based on certain of our high cost financing arrangements. We may be unable to pay dividends in the near or medium-term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our projects, financial condition and results of operations.

- 14. *We face significant competition in our business from Indian sugar manufacturers, which may adversely affect our profitability.***

The sugar industry is highly competitive. Domestically, we compete with numerous small to medium size producers. Despite increased consolidation, the Indian sugar industry remains highly fragmented. Our major competitors in India are sugar mills based in the Madhya Pradesh and nearby states. Further, we also face competition from the sugar mills based in the Indian state of Maharashtra. Additionally, excess sugar stocks may be dumped by competitors from other states into the northern India region markets, leading to excess supply and price drop.

- 15. *We are substantially dependent on our revenue from sugar.***

We are substantially dependent on our revenues from sale of sugar and any decline in our revenues from sugar will adversely impact our profit margins. For example, our revenue from operations from our Sugar Segment during Fiscal Year 2022 and 2021 amounted to 7600.51 and 7060.05 respectively. Although our strategy is to actively grow our other lines of business, our sugar business will continue to constitute a significant portion of our revenues. Any decline in our sugar revenues will adversely affect the results of our operations.

- 16. *Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.***

Being into retail business, there exist substantial requirement of working capital and financing in the form of fund based working capital facilities to meet our requirements. The details of our working capital for the period ended October 31, 2023 and year ended March 31, 2023, March 31, 2022 & March 31, 2021 are as under which is showing continuous increase:

17. We do not own the premises in which our registered office is located and the same is on lease arrangement. Any termination of such lease/license and/or non-renewal thereof and attachment by Property Owner could adversely affect our operations.

Our Registered Office is presently located at 205, Naroli Arcade 19/1, Manorama Ganj, Palasia Square, Indore, Madhya Pradesh- 452001. The registered office is not owned by Company, it is owned by Mr. Mehmood Khan, the Promoter/Director of our Company. The premises have been taken on lease basis from him for a period of five (5) years commencing from 01/07/2022.

Upon termination of the lease, we are required to return registered office premises to the Lessor/Licensor, unless it is renewed. There can be no assurance that the term of the agreements will be renewed on commercially acceptable terms and in the event the Lessor/Licensor terminates or does not renew the agreements, we are required to vacate our registered office business where administrative activities are carried out. We may be required to identify alternative premises and enter into fresh lease or leave and license agreement at less favorable terms and conditions. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability.

18. Our results of operations could be adversely affected by a disruption of operations at our manufacturing facilities.

We own and operate one sugar production facilities located at Datia. All of these facilities are subject to operational risks, including:

- equipment failure;
- failure to comply with applicable regulations and standards;
- obtaining and maintaining necessary licenses;
- raw material and/or energy supply disruptions;
- labour force shortages or work stoppages; and
- natural disasters.

While our facilities are insured against standard risks such as fire, there can be no assurance that the proceeds available from our insurance policies would be sufficient to protect us from possible loss or damage. In addition, we do not currently have business interruption insurance. As a result, a significant disruption in operations at any of these production facilities resulting from the events above or other events may adversely affect our business, financial condition and results of operations.

19. Our crushing operations are subject to availability of water.

We operate in Datia, Madhya Pradesh. Our crushing operations at the sugar mills are subject to the availability of ample amounts of water in the respective regions. For instance, low rainfall and droughts in the state of Madhya Pradesh has resulted in the state government of Madhya Pradesh requiring sugar mills in the state to curtail their operations. Non-availability of water at any of our units would result in us not being able to carry

out our crushing operations efficiently or at all and accordingly, adversely affect our revenues, financial condition and results of operation.

20. *We are highly dependent on our cane development initiative to increase our raw material.*

Under Indian law, we are required to purchase all of our raw material (sugarcane) from within our reserved area. The restriction on our ability to procure sugarcane from beyond our reserved area means that the only way for us to increase the volume of raw material procured by us, is to improve the yield of the sugarcane grown within our reserved areas. As a result, we focus on developing the quality of the sugarcane, to ensure better recovery rates; and the quantity of sugarcane, to increase the volume of raw material accessible to us.

Our inability to effectively manage our cane development initiative and improve the yield of the sugarcane in our reserved areas will affect the volume of raw material that we procure, our revenues, financial condition and results of operation.

21. *Our success depends in large part upon our key personnel and our ability to attract, train and retain such persons.*

Our success depends on the continued services and performance of our senior management and sales agents. Competition for senior employees and sales agents in the industry is intense and we may not be able to retain our existing team members or attract and retain new team members in the future. The loss of any member of our key team may adversely affect our business, results of operations and financial condition. We do not maintain keyman's life insurance for our Promoters, senior members of our management team or other key personnel.

22. *Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

We employ seasonal workers, who are employees of the Company and work only during the sugarcane crushing season. Historically, we have not experienced any significant strikes or other labour disputes. However, there can be no assurance that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations. We are also dependent on the farmers, that we are associated with, within our reserved area and if they experience disruptions related to their workforce, including strikes and work stoppages, it may have an adverse effect on our business and results of operations.

23. *India's infrastructure may be less developed than that of many developed nations.*

India's infrastructure may be less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or other public facilities could disrupt our normal business activity. Any material deterioration of India's infrastructure, including technology and telecommunications, adds costs to doing business in India. These problems could interrupt our business operations and reduce demand for our services, which could have an adverse effect on our business and results of operations.

24. *Certain Agreements, deeds or licenses may be in the previous name of the company.*

Our certain agreements, deeds or licenses may be in the name of the erstwhile name of the company Dollex Agrotech Private Limited. In case we fail to change the name in the agreements, deeds or licenses it may cause adverse effect on Our Company's business & operations.

25. *The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles "Objects of the Issue."*

The fund requirement and deployment, as mentioned in the "Objects of the Issue" on page 45 of this Draft letter of offer is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan.

We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter Objects of the Issue is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter Objects of the Issue will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

26. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into various transactions with related parties. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties.

27. *As the Equity Shares of our Company are listed on NSE-Emerge, our Company is subject to certain obligations and reporting requirements under SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us/our promoter liable to prosecution and/or penalties.*

Our Company is subject to the obligations and reporting requirements under SEBI Listing Regulations. In the past, our Company had complied with all the provisions of the SEBI Listing Regulations. Further our Company did not receive any communication regarding non-compliances from the Stock Exchange or any authority.

28. *We operate in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.*

India is our primary market and we face high competition in our business from local as well as nationwide players in our industry. Our key products are available from a large number of players providing same or similar products in our industry. Thus, factors affecting our competitive success include, amongst other things, price, demand for our product and/or services, brand recognition and reliability. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement and administrative costs and improve our operating efficiencies. If we fail to do so, our competitors may be able to provide their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations. Our competitors vary in size, and may have better financial, marketing personnel and other resources than us and certain of our competitors have a longer history of established business and reputation in the Indian market as compared with us. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our services, which may result in a decline in our revenues and profitability.

29. *Fluctuations in prices of raw material and if we are unable to maintain appropriate time span between procurement and selling of our product it may cause huge losses.*

Any fluctuation in the prices of raw material may affect our cost and supply of the services. Therefore, any significant increase in these prices due to any reasons, and our inability to pass on increased costs to our consumers or reduction in demand from our consumers, may adversely affect our revenue and profitability. For further details, see Our Business on page no. 69 of this Offer Document.

ISSUE SPECIFIC RISKS

1. *We will not distribute this Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer, Application Form and Rights Entitlement Letter to overseas Shareholders who have not provided an address in India for service of documents.*

In accordance with the SEBI (ICDR) Regulations and SEBI Rights Issue Circulars our Company will send, only through email, this Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer, the Rights Entitlement Letter, Application Form and other issue material to the email addresses of all the Eligible Equity Shareholders

who have provided their Indian addresses to our Company or who are located in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

2. SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021 and May 19, 2022 streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Draft Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI in 2020. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020 and January 19, 2021, April 22, 2021 and May 19, 2022, as applicable (“SEBI Rights Issue Circular”) and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 137.

In accordance with Regulation 77A of the SEBI (ICDR) Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialized form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise of Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

3. The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.

In accordance with the SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares).

4. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your

percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “Terms of the Issue” on page 137.

5. Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

6. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

7. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant’s decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants’ ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

8. You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

9. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

10. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

11. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

12. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

13. Investors will not have the option of getting the allotment of Equity Shares in physical form.

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see "Terms of the Issue" on page 137. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

14. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

1. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.

Summary statements of assets and liabilities as at March 31, 2023 and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2022 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our restated financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

2. Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy is influenced by economic developments in other countries. These factors could depress economic activity which could have an adverse effect on our business, financial condition and results of operations. Any financial disruption could have an adverse effect on our business and future financial performance.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

3. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- Any increase in Indian interest rates or inflation;

- Any scarcity of credit or other financing in India;
- Prevailing income conditions among Indian consumers and Indian corporations;
- Changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- Prevailing regional or global economic conditions; and
- Other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

4. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- The General Anti Avoidance Rules ("GAAR") have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- A comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

5. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

6. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GOI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

7. *Changes in the Government Policy could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies

that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

8. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

9. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

10. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concerns regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

11. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Consequently, our business, operations, financial performance will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- Any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- Hostile or war like situations with the neighbouring countries;
- Macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing

costs;

- Decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- Downgrading of India's sovereign debt rating by rating agencies; and
- Difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.
- Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

Global Economic Overview

Over the next decade, world per-capita sugar consumption is projected to increase, mainly spurred by income growth in low and middle-income countries in Asia and Africa. The overall rise in sugar intake is expected to be mitigated by a modest decline in per capita consumption in high-income countries, reflecting rising health concerns among consumers, and measures implemented at country level to discourage sugar consumption. Despite the diverging trend, however, average per-capita consumption in low- and middle-income countries, notably in Sub-Saharan Africa, is anticipated to remain substantially lower than in high income countries.

Sugar is projected to remain the most consumed caloric sweetener still accounting for 80% of the global sweetener utilization despite general efforts to find substitutes. The main alternative caloric sweetener, High Fructose Corn Syrup (HFCS), is anticipated to, at best, maintain its share at around 8% of total consumption, while the remaining balance is accounted for by low-caloric High Intensive Sweeteners (HIS), including saccharin, sucralose and aspartame.

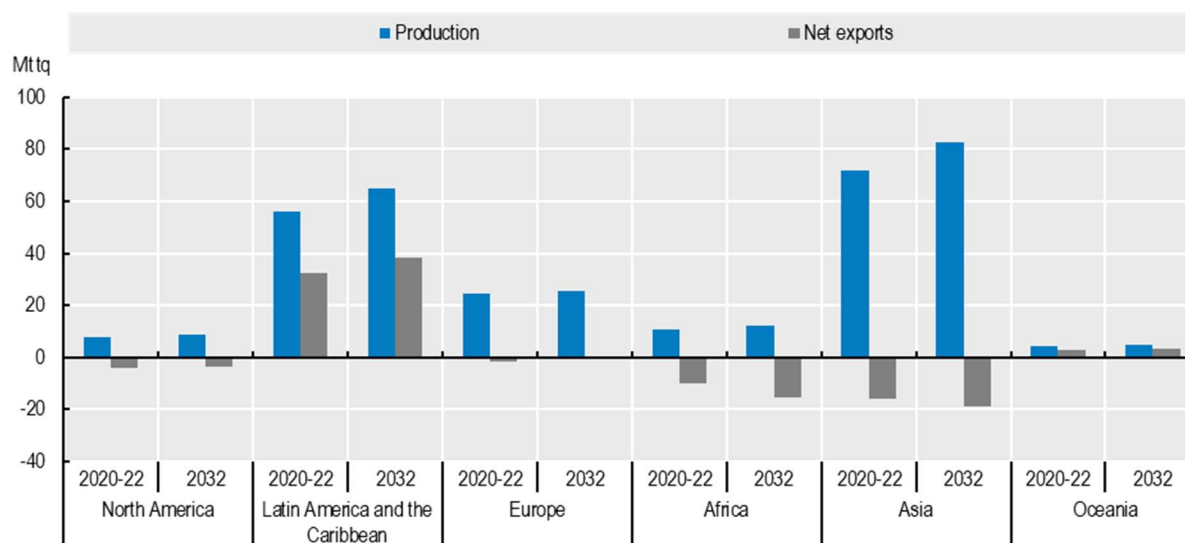

Over the outlook period, sugar production is expected to expand mainly in key sugarcane producing countries. Sugarcane, which grows mostly in tropical and sub-tropical regions, will continue to account for more than 85% of the aggregate sugar crops output. Brazilian production is expected to increase as a result of both area expansion and yield improvements, driven by remunerative prices. Productivity gains, including varietal improvements and higher extraction rates, will drive sugar production growth in India and Thailand, with acreage projected to remain relatively stable. In Africa, sugarcane production in the key producer, South Africa, is anticipated to expand on account of government support measures to the sector. Production of sugar beet, which grows mainly in the Northern Hemisphere, is foreseen to remain quite stable in the European Union, while increasing in Egypt, boosted by rising regional and industrial demand. The increase in sugar beet production in Egypt is projected to consolidate its position as the continent's largest sugar producer by 2032.

Over the next decade, the supply of sugar will continue to be tempered by the use of sugar crops as a feedstock for ethanol. In Brazil, the ambitions of the Renovabio program encourage ethanol production and sugarcane will remain the main feedstuff for reaching the 2030 target. Constant real international crude oil prices will favour sugarcane-based ethanol production, while Brazilian sugar production will remain competitive in international markets, even if the Real is assumed to appreciate in real terms. Brazilian processors, who can easily switch between sugar or ethanol from sugarcane, will continue to arbitrate according to the relative profitability of the two products; over the next ten years, ethanol is projected to become more attractive relative to sugar. In some other countries, implementation of policies

promoting the development of biofuels will also add some pressure to the availability of sugarcane for sugar production, especially in India, with the Ethanol Blended Petrol (EBP) Programme aimed at reaching a blending rate of 20% of ethanol in petrol (E20) by 2025/26.

In 2032, Brazil and India are foreseen to account for about 23% (45 Mt) and 19% (38 Mt) of the world's total sugar output respectively. Better growth prospects are expected in Brazil, supported by profitable sales on the international market while in India, despite an increase in the extraction rate, the increase is projected lower given the diversion of sugarcane to ethanol production. Elsewhere, the largest significant increase in production, in absolute terms compared to the base period, is anticipated in Thailand (+ 5 Mt).

International trade will continue to grow, mainly reflecting expanding demand from deficit regions in lowand middle-income economies. Exports are anticipated to increase over the decade with shipments representing about 38% of global sugar production in 2032, up from 36% in the base period. Exports will continue to originate in a few countries, mainly in Brazil (46% of world trade), followed by Thailand and India. Imports are anticipated to remain less concentrated with the main increases projected in Asia and Africa, while the strongest declines in imports are foreseen in the United States, Russia and Japan, reflecting higher domestic production and a contraction in domestic demand for the latter. While the bulk of the sugar marketed worldwide will continue to be in the form of raw sugar from sugarcane, the share of white (refined) sugar from sugar cane and sugar beet is seen increasing moderately.

International sugar prices in real terms are foreseen to fall from the current high levels amid an improvement in global export availabilities and to decline during the projection period from productivity gains. The downward pressure on prices is expected to be partially offset by constant real international crude oil prices, encouraging the use of sugar crops for ethanol production. The white sugar premium (difference between white and raw sugar prices), which was particularly high (on average USD 101/t during the base period) due to tightness on the white sugar market, is anticipated to slightly increase in nominal terms over the outlook period, with the share of white sugar imports in total trade growing by 2032.

The dynamics of the sugar markets as presented in this Outlook are subject to many risks and uncertainties, including developments in the global macroeconomic context and implementation of new sugar-related policies. In addition, weather conditions, profitability of sugar vis-à-vis ethanol, and competition with

other crops are sources of production uncertainty. On the demand side, developments in the global economy that affect consumers' purchasing power, consumers' preferences and inflation levels are key factors that could alter the consumption patterns presented in this Outlook.

Indian Economy Overview

As if the moon was not enough, India is now aiming for the stars. After the successful launch of Chandrayaan-3 on August 23, 2023, India has now set its sights on the sun by launching Aditya-L1, a spacecraft designed to study the solar atmosphere. Only a handful of countries have achieved this historic feat.

And it is not just in science where India is taking big leaps. The Indian economy, according to IMF estimates, will emerge as the world's third largest economy by 2027, hopping over Japan and Germany, as its GDP crosses US\$5 trillion dollars. By 2047, India aspires to be a developed economy.

According to our estimates, India will need at least 6.5% growth to reach its first milestone in 2027 and about 8%–9% growth to reach the second in 2047. The buoyancy in the economy instills confidence that the country, at least in the short run, will likely achieve these numbers. The pace in the first few years will be critical for a sustained, fast-growth trajectory in the long run.

In light of the Q1 GDP growth, we have revised our growth estimate for this year to reflect it. We expect GDP to grow in the range of 6.5% to 6.8% primarily due to festive spending in the coming months followed by higher government spending before the upcoming national elections mid-next year. We believe GDP growth will be over 6.5% next year as geopolitical uncertainties subside, and the global economy bounces back on a stronger growth path.

Navigating geopolitical uncertainties and the slowdown in the global economy, undoubtedly, will not be easy. India will have to rely on its own domestic demand to firepower its growth, specifically, private consumption and investment spending. What works in India's favor on the private consumption front is the size of its consumer base, the rising income, and the aspirations of its young population, which is the largest in the world. As for investments, with the size and scale of operations it has to offer to global companies, the availability of skill and talent, and technology and innovation capabilities, India continues to be an attractive investment destination.

The spotlight, in this outlook, is on India's micro, small, or medium enterprises (MSMEs). These, we believe, will be key in generating income, capabilities, capacities, and ecosystems needed for sustained growth in consumption and investment that is broad-based and comes from all sections of the economy. The MSME sector will also drive innovation and new opportunities in a cost-effective manner. It will drive job creation and entrepreneurship, especially for women in rural India. In short, the sector will help India reap the potential benefits of its demographic dividend and the expansion of the middle-income class.

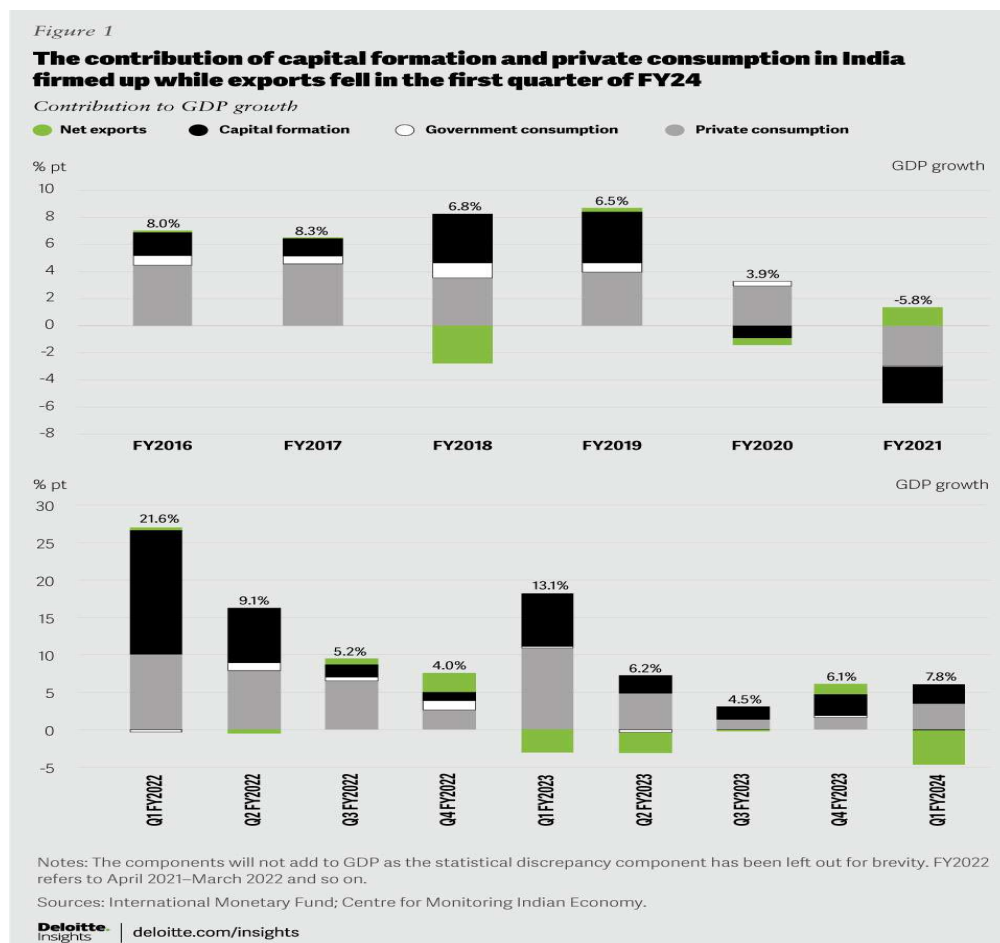

The good news is that the past two quarters have seen an uptick in the MSME sector. Out of the shadow of the pandemic, the steady revival of this sector will likely help India achieve broad-based growth at the grassroots levels, which is needed to ensure sustained economic activity.

Decoding growth in Q1 FY24

India grew 7.8% in the first quarter, which is close to the Reserve Bank of India's (RBI's) estimate of 8.1%. A large part of this growth came from strong domestic demand even during the time the global economic slowdown weighed on exports, which contracted by 7.7% after growing in double digits for eight consecutive quarters. While the contraction was broad-based due to moderating demand, the exports

in electronics goods remained strong—its share in total exports has gone up from 3.4% to 7.2% in two years. What aided this growth was the accelerated digitization around the globe and India’s determination to accelerate efforts towards self-sufficiency in the electronics space.

Private sector investment grew 7.8% YoY, thus maintaining the steady momentum of the past five quarters, aided by the crowding-in effect of higher capital expenditure by the government. The highlight was probably the strong revival in private consumption by 6 % after its lackluster growth for two quarters. Modest consumer spending, to some extent, has kept private investment on a leash. The strong consumption growth this first quarter bodes well for investors, who are waiting for sustained cues in consumer demand to invest. The completion of investment projects, as per the Center for Monitoring Indian Economy’s (CMIE’s) capital expenditure database, showed a strong jump in the first quarter. Moreover, the pipeline of upcoming projects appears quite strong.

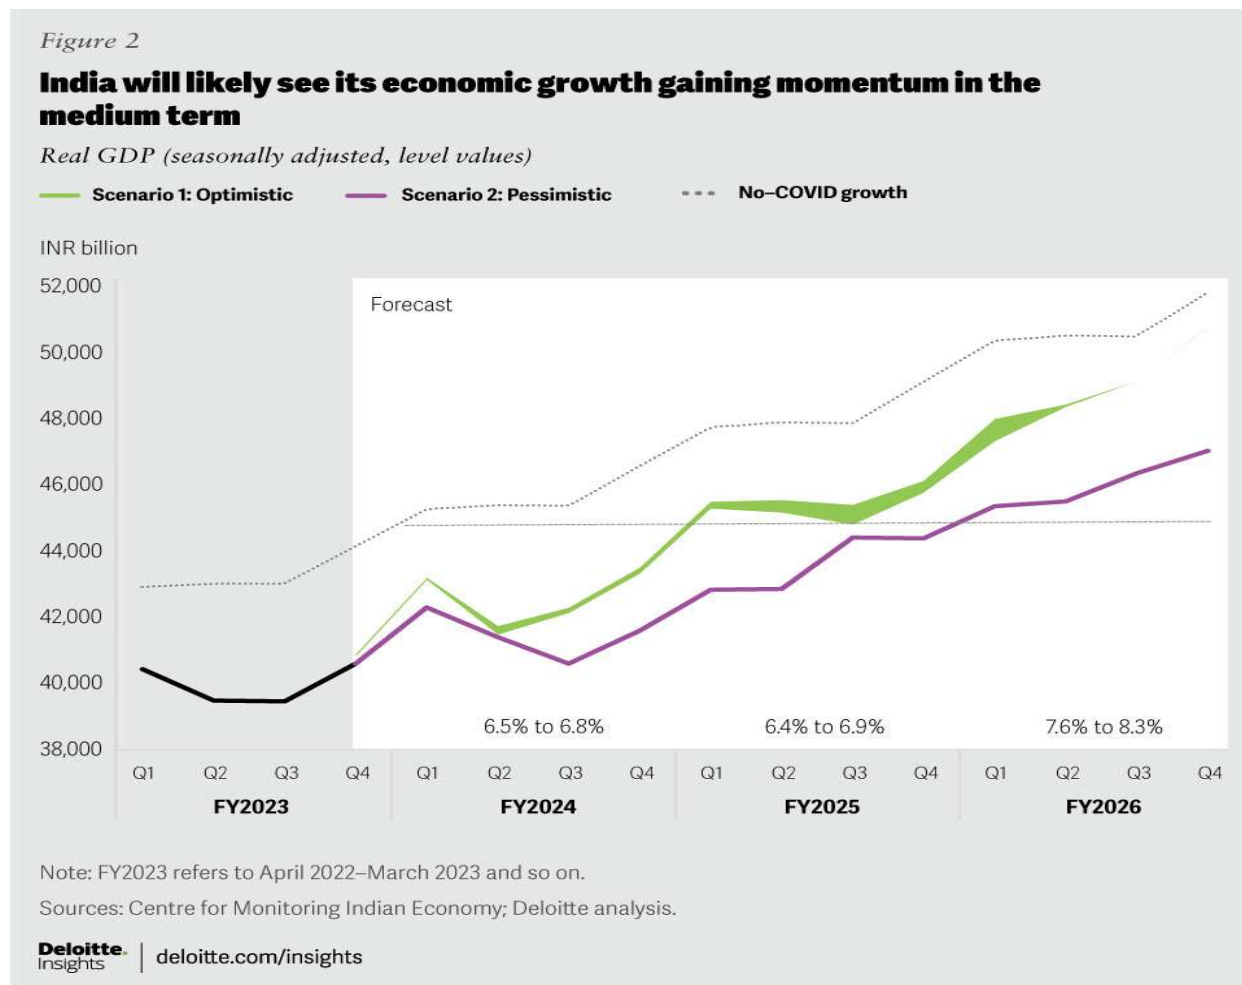

The manufacturing and construction sectors—buoyed by pick-up in capital expenditure by the government, the rise in demand for new residential properties, and falling input prices (as indicated by wholesale and fuel prices)—witnessed robust growth of 4.7% YoY and 7.9% YoY, respectively. But the biggest boost in growth came from the services sector, which grew 10.3% YoY in the first quarter, up from 6.9% in the previous quarter. This boost can be attributed to strong growth in the financial, real estate, and business services sector. It also corroborates the consistent rise in the export of professional services. An uptick in credit growth following the improvement of the bank balance sheets, rising deposits, and innovation in the fintech space played a vital role as well. The trade, transport, and communication sector also did well (9.2% YoY).

Growth in the agriculture sector, in contrast, slowed down marginally to 3.5% year over year. The delay in the arrival of the monsoons and spatial rains across the country impacted agriculture output in June. So

far, cumulative rains have been below normal, which will likely temper agriculture growth in the first half of FY2023-24. A slowing agriculture output could exacerbate food inflation further, and therefore, weigh on consumer spending and investment.

What lies ahead

We continue to remain optimistic about the economy this year and expect India to grow between 6.5% and 6.8% between FY23 and FY24 in our baseline scenario, followed by an average of 6.65% and 7.95% over the next two years as the global economy turns buoyant (figure 2). (For more on our baseline and pessimistic scenarios, see Key assumptions.)

Our worries about inflation persist. High food prices, especially the double-digit growth in pulses and cereals, which have a significant share in the CPI food basket, are concerning. Besides, oil prices are trending up quickly. Food and fuel prices are likely to keep inflation high. The spillover effect on core prices, which have been stable so far but in the upper bracket of the RBI’s desired range, could lead to inflation getting out of control. We expect higher prices over the next 1.5 years. We expect inflation to remain in the upper range of the RBI’s inflation target band over the entire forecast period (figure 3).

Indian Sugar Industry

The Indian sugar industry, second largest in the world, is a key driver of rural development, supporting India's economic growth. The industry is inherently inclusive supporting over 6 million farmers and their families, along with workers and entrepreneurs of over 550 sugar mills, apart from a host of wholesalers and distributors spread across the country. Contribution of sugarcane to the national GDP is 1.1% which is significant considering that the crop is grown only in 2.57% of the gross cropped area. In India sugar is an essential item of mass consumption, and the domestic demand is around 25 million tonnes per annum. Sugar and jaggery are the cheapest source of energy, supplying around 10% of the daily calorie intake. Sugarcane has been projected as the crop for the future, contributing to the production of not only sugar but also a renewable source of green energy in the form of bioethanol, bioelectricity and many bio-based products. The industry produces 350–365 million tons (Mt) cane, 25–27 Mt white sugar and 6–8 Mt jaggery and khandsari every year. Besides, about 2.7 billion litres of alcohol and 5500 MW of power and many chemicals are also produced. The industry is able to export around 3200 MW of power to the grid. The major challenges for sugarcane agriculture are static sugarcane productivity (70 tons/ha) and sugar recovery

(10%) at national level.

The Indian sugar industry is fully capable of meeting demand of potable alcohol as well as 5% blending in gasoline. Industry is gradually transforming into sugar complexes by producing sugar, bioelectricity, bioethanol, bio-manure and chemicals. Emergent businesses like fuel ethanol, raw sugar and structural changes in global market have provided new horizons for the Indian sugar industry. The sector today not only has transformational opportunities that would enable it to continue to service the largest domestic markets but has also emerged as a significant carbon credit and green power producer and has potential to support ethanol blending programme of E10 and beyond. The sugar industry is gearing up to meet the challenges of 2030 through judicious integration of agro-technology, improved management practices, diversification and farmers' friendly policies. The crop besides providing the food and energy needs of the country also contributes to employment and revenue generation, social development and environmental safety. Because of the manifold benefits from the crop and its wide and varied uses, sugarcane agriculture will remain a major contributor to the sustainable development of sugar industry in India.

India's sugar exports

— Exports in million tons

Note: Marketing year runs from Oct to Sept

Source: Indian Sugar Mills Association | By Rajendra Jadhav

The Indian Sugar Mills Association (ISMA) released its preliminary projections for the 2023-24 sugar season (SS), forecasting sugar production at approximately 337 lakh tonnes (lt), a decline of around 8 per cent from the estimated 366 lt for 2022-23. This gross sugar production for 2023-24 SS without considering diversion towards ethanol shall be sufficient for domestic consumption, ISMA stated.

“This is particularly promising, considering that India’s average domestic sugar consumption stands at approximately 278.5 lakh tonnes, signifying a favourable equilibrium between production and consumption in the coming year,” ISMA added.

Based on the satellite images procured in the latter part of June 2023, the total acreage under sugarcane in the country is estimated to be around 57 lakh hectares in 2023-24 SS. The images of the cane area, field reports regarding expected yield, sugar recovery, drawal percentage, impact of previous and current year’s rainfall, water availability

in reservoirs and other related aspects were discussed in the ISMA meeting and accordingly first advance estimates for 2023-24 SS are being released.

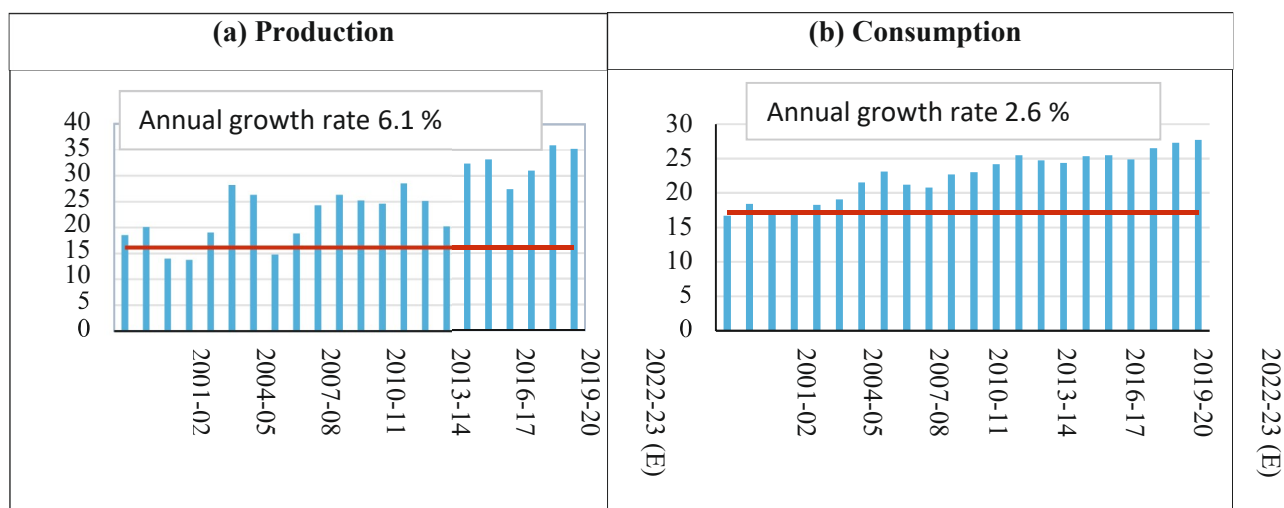

Diversion of sugar towards ethanol shall be estimated only after declaration of feedstock-wise ethanol procurement price for ESY 2023-24, ISMA added.

Overview

India is the largest consumer and the second-largest producer of sugar in the world accounting for about 18.8 percent of world sugar production and 16.2 percent of world sugar consumption in TE2021-22. As on 30th September 2022, there were 757 sugar mills in the country with installed capacity of 431.5 lakh tonnes, out of which 522 mills were operational with capacity utilisation of 91.5 percent. Despite cyclical nature of Indian sugar production; India has become a net structural surplus producer of sugar. During the last 10 years, on an average the country had net surplus production of 3.2 million tonnes of sugar except for the year 2016-17. Over the past two decades, sugar production in India has grown by 6.1 percent per annum, while consumption of sugar has grown by 2.6 percent per annum (Chart 1.1).

As per the Department of Food & Public Distribution, sugar production in the country was estimated at about 36 million tonnes in 2021-22, which was 16 percent higher than the last year. This was due to increase in sugarcane production in major producing states viz. Maharashtra and Karnataka, owing to favourable climatic conditions and adoption of improved varieties. However, in 2022-23, sugar production is estimated to be marginally lower at 35.2 million tonnes due to increase in diversion of sugar for ethanol production. Sugar production in major producing States during 2001-02 to 2022-23 is given in Annex Table 1.4. Diversion of sugar for ethanol production has been estimated to increase from 3.5 million tonnes in 2021-22 to 5 million tonnes in 2022-23, an increase of 42.9 percent. On the other hand, sugar consumption increased by 3 percent in 2021-22 over previous year and is expected to be 27.7 million tonnes in 2022-23, a marginal increase of 1.5 percent over 2021-22.

Sugarcane Production

As per the Food and Agriculture Organization (FAO), about 87 percent of the world's sugar is produced from sugarcane, and the remaining 13 percent from sugar beet. In 2020, sugarcane was cultivated in about 26.5 million hectares in more than 90 countries globally, with production of about 1.9 billion tonnes. Brazil was the leading producer in terms of acreage and sugarcane production, followed by India and China. These three countries together accounted for more than two-third of the global sugarcane production. Among the world's top five sugarcane producers, the highest yield was observed in China, followed by India in 2020. During the last decade, in terms of acreage, production, and crop yield, India experienced significantly higher Compound Annual Growth Rate (CAGR) than the world average (Table 1.2).

During the last two decades, sugarcane production in India has been exhibiting cyclical trend of 2-3 years. However, during the last four years, the area under sugarcane cultivation and sugarcane yields have consistently increased due to the adoption of high-yielding varieties, farm mechanisation as well as favourable climatic conditions. During 2021-22, about 51.5 lakh hectares of land was under sugarcane cultivation with annual production of about 431.8 million tonnes and yield of 83.9 tonnes per hectare. As per the first advance estimates of Directorate of Economics and Statistics (DES), India's sugarcane production is estimated to reach 465 million tonnes in 2022-23, about 7.7 percent higher than 2021-22 (Chart 1.2).

Chart 1.2 Trends in Area, Production and Yield of Sugarcane in India

*: Fourth Advance Estimates; **: First Advance Estimates

The cultivation of sugarcane crop is mainly concentrated in three States namely Uttar Pradesh, Maharashtra and Karnataka, accounting for more than 80 percent of India's production. Uttar Pradesh accounted for 40.9 percent of total sugarcane area under cultivation and 42.3 percent of sugarcane production in TE2022-23. The share of Maharashtra in area under sugarcane cultivation was 25 percent and 27.6 percent in sugarcane production while Karnataka's share was 11.8 percent in area and 12.6 percent in production in TE2022-23. The sugarcane yield is estimated to be highest in Tamil Nadu (104.6 t/ha), followed by Karnataka (95.3 t/ha), Maharashtra (92.6 t/ha) and Uttar Pradesh (81.5 t/ha) during the same period. Owing to different agro-climatic conditions and crop duration, the yield levels of the tropical States like Tamil Nadu and Karnataka are higher than those of the sub-tropical region States like Uttar Pradesh, but the yield difference between the two regions has reduced significantly during recent years. Good rainfall over the last two years, adoption of improved cane varieties, better agronomic practices and use of water efficient micro irrigation systems has resulted in increase in productivity of sugarcane in the recent years. The trends in area, production and yield of sugarcane in major producing States during 2001-02 to 2022-23 are given in Annex Tables 1.1 to 1.3.

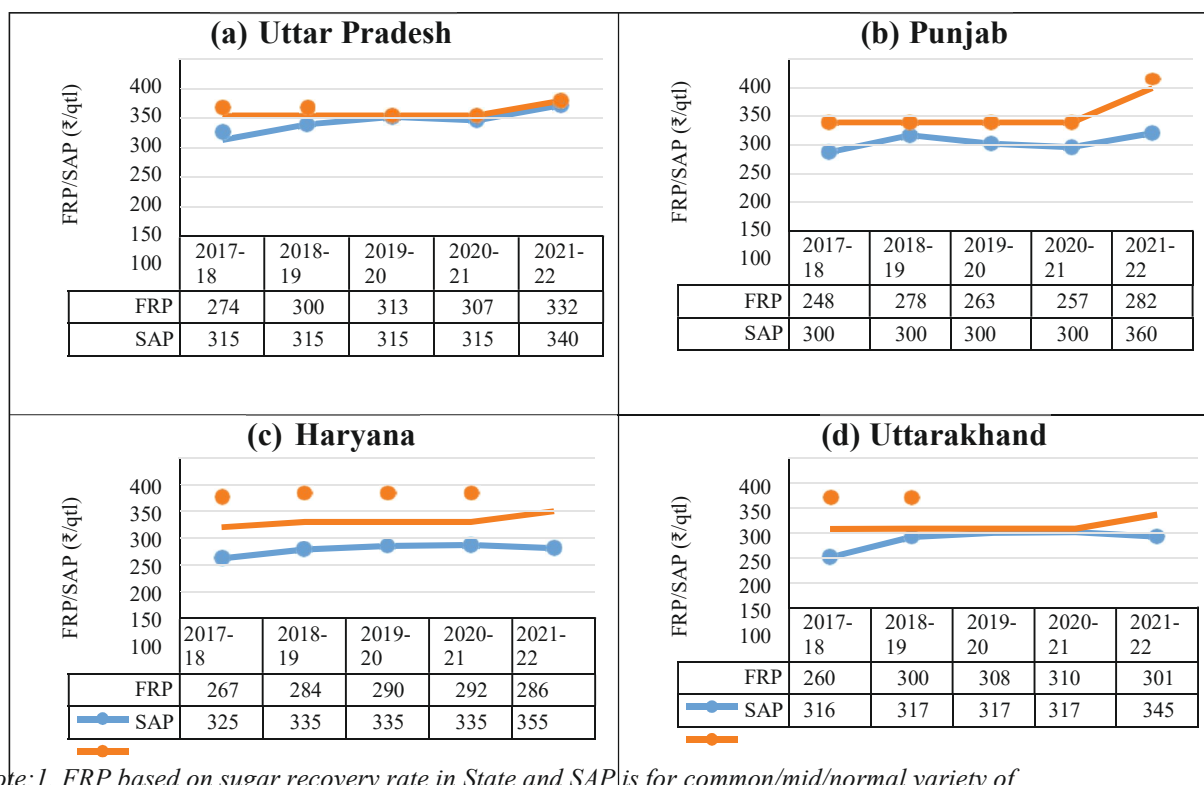

Sugarcane Pricing to minimize Cane Price Arrears

The statutory provisions of Sugarcane (Control) Order, 1966 issued under the Essential Commodities Act (ECA), 1955, govern the pricing of sugarcane in India. On 22 October 2009, the Sugarcane (Control) Order, 1966 was amended and the concept of Statutory Minimum Price (SMP) of sugarcane was replaced with the 'Fair and Remunerative Price (FRP)' from 2009-10 sugar season. In order to incentivize higher sugar recoveries, the FRP is linked to a basic recovery rate of sugar, with a premium payable to farmers for higher recovery of sugar from sugarcane. The Central government had delegated powers to the State Governments vide Gazette Notification G.S.R. 663(E), dated 22 October, 2020, for fixation of mill-wise FRP for every sugar season from 2019-20 onwards.

Haryana, Punjab, Uttarakhand and Uttar Pradesh intervene in sugarcane pricing by announcing State Advised Price (SAP), which largely remains higher than the FRP. Though SAP is announced for different categories, it is not linked to sugar recovery, as a result it does not promote and incentivise higher sugar recovery and efficiency in sugar production. Since sugar mills are required to pay SAP, which is higher than the FRP, resulting into mounting cane price arrears to farmers, especially when sugar prices are low. Due to increase in sugar recovery rate, the difference between SAP and FRP has significantly reduced in Uttar Pradesh since 2019-20. However, during 2021-22, SAP in all four States was increased, thereby

widening the gap between SAP and FRP in Punjab, Haryana and Uttarakhand, while the difference between SAP and FRP has reduced in Uttar Pradesh due to improvement in sugar recovery rate. The CACP is thus of the firm view, that Government of UP should adopt FRP and Revenue Sharing Formula for cane pricing (Chart 1.3).

Chart 1.3: Comparison between FRP and SAP of Sugarcane

Note: 1. FRP based on sugar recovery rate in State and SAP is for common/mid/normal variety of sugarcane.

2. Sugar recovery rate is inclusive of sugar diverted for ethanol.

Source: 1. Directorate of Economics & Statistics, Ministry of Agriculture and Farmers Welfare for FRP

2. Department of Food & Public Distribution, Ministry of Consumer Affairs, Food & Public Distribution for sugar recovery rate and SAP.

The dual cane pricing of FRP & SAP in different States distorts the economics of cane and sugar and leads to substantial cane price arrears. The problem of cane price arrears aggravates during the periods of high sugar production and low sugar prices. Recently with sugar prices firming up, increase in exports and higher ethanol production from sugar, the magnitude of cane price arrears has moderated but it still remains high (Table 1.3). Therefore, the Commission reiterates its earlier recommendation that in order to improve efficiency in sugarcane and production, restoring financial health of sugar mills and reduce the cane price arrears, State governments should refrain from announcing SAP. The State Governments, which continue to announce SAP, may pay the difference between SAP and FRP directly through DBT to farmers.

India's Trade Policy

India has been a surplus producer of sugar during the last several years and to promote exports of sugar, the export duty on sugar was removed in March 2018. Moreover, from time to time when domestic prices of sugar in India have been higher than the international prices, Government has also supported exports of surplus stocks of sugar with subsidies. Under the recent revision in the 1st Export-Import policy, export of sugar has been placed under “restrictive” category w.e.f. 1st June, 2022 till 31st October, 2023 but import of sugar is free without quantitative restrictions, subject to prevailing duties. The following sections discuss the evolution of export and import policy of sugar in India.

Evolution of Export Policy

Export of sugar has been gradually liberalized in the country. Due to surplus production and comfortable stocks of sugar, Government of India had permitted export of 15 lakh tonnes in 2010-11 and 20 lakh tonnes in 2011-12 under OGL through release order mechanism. This mechanism was dispensed with from May 2012 onwards. In 2012-13 and 2013-14, the fall in international sugar prices due to high global production made Indian sugar exports uncompetitive. Subsequently, a scheme was notified in February 2014 to give incentives for marketing and promotion of raw sugar production targeted for export markets. Under the scheme, an export target of 40 lakh tonnes during 2013-14 and 2014-15 sugar season was set subject to the condition that the incentives available under the scheme shall be utilized by the sugar mills for making payment to the farmer.

In February 2015, the export incentive amount was increased to ₹4,000 per tonne of raw sugar (on flat basis) for 2014-15 sugar season, subject to ceiling of 14 lakh tonnes. However, this export incentive was discontinued and in June 2016, anticipating fall in sugar production during 2016-17, Government imposed an export duty of 20 percent on sugar exports under OGL in the interest of domestic market. Subsequently, in 2017-18, domestic sugar production rebounded and Government withdrew the export duty on sugar in March 2018. Further, in order to promote exports and stabilize the falling domestic sugar prices, mill-wise Minimum Indicative Export Quota (MIEQ) of 20 lakh tonnes was fixed. In addition, Government allowed Duty Free Import Authorization (DFIA) Scheme for duty free import of raw sugar intended for export.

Anticipating surplus sugar production in 2018-19 and excess carryover stocks, various policy initiatives were initiated to facilitate sugar exports and improve liquidity in the industry. In September 2018, mill-wise export targets were fixed allocating MIEQ of 50 lakh tonnes of sugar for export in sugar season 2018-19 and simultaneously, in October 2018, a scheme for extending assistance towards internal transport, freight, handling and other charges to facilitate exports during the sugar season 2018-19 was also notified for sugar mills.

In September 2019, Government of India notified a scheme for providing assistance at the rate of ₹10,448 per tonne to sugar mills for expenses on marketing costs including handling, upgrading and other

processing costs, cost of international and internal transport and freight charges on export of 60 lakh tonnes under Maximum Admissible Export Quantity (MAEQ). The Government also allowed those sugar mills, which had partially exported their MAEQ quota of sugar season 2019-20 till 30 September 2020, to export the balance quantity of their quota by 31st December 2020 (vide notification dated 15 September 2020).

In the sugar season 2020-21, export incentives at the rate of ₹6,000 per tonne (for marketing expenses, internal transport and ocean freight) were notified in December 2020 for MAEQ of 60 lakh tonnes. This lump sum assistance was meant for those sugar mills which exported domestically manufactured sugar (of their own or through an exporter) under Open General License (OGL) and not under “advance license”. This incentive was, however, reduced to ₹4,000 per tonne of sugar; vide notification dated 20 May 2021. The reduced assistance was limited to only internal transport and ocean freight. In September 2021, the timeline for availing MAEQ benefits for sugar season 2020-21 was extended from 30 September 2021 to 30 November 2021.

In the year 2021, due to production shock in the sugarcane cultivation in Brazil (owing to dry weather and subsequent frost attack in cultivation areas), the international prices of sugar surpassed domestic prices in India, making exports of Indian sugar competitive in the international market without subsidies in sugar season 2021-22.

Various countries have challenged domestic support measures as well as export subsidies provided by India. However, given the strategic importance of such support, the NITI Aayog's Task Force on Sugarcane and Sugar Industry (March 2020) recommended continuing with the export incentives for sugar but making them compliant with WTO trade rules.

Apart from regular exports, it is noteworthy that Indian sugar is also exported under the Tariff Rate Quota (TRQ) scheme to various countries whereby a fixed volume of the given commodity can enter the importing country at relatively low tariffs. After the quota is reached, a higher tariff becomes applicable. India has been exporting sugar under TRQ to USA and EU in the recent years. For instance, DGFT had allocated 8,727 MTRV (Metric Tonne Raw Value) of sugar (in the form of raw cane sugar / refined and specialty sugar/sugar-containing products) to be exported to USA for fiscal year 2021, vide Public Notice dated 18 December 2020 and 23 November 2021, to be exported till 31 December 2021. For fiscal year 2022, a total quantity of 10,475 metric tonnes of sugar has been notified by DGFT for export to USA till 31 December 2022 under the TRQ, vide notification dated 6 May 2022 and 12 October 2022. Similarly, 5,841 tonnes of raw/refined sugar had been authorized to be exported to EU under the TRQ scheme from 1 October 2021 to 30th September 2022, vide DGFT Public Notice dated 4 October 2021.

However, vide DGFT notification dated 24 May 2022, Government of India modified the export policy of sugar (raw, refined and white sugar) from “Free” to “Restricted” w.e.f. 1 June 2022, in order to maintain domestic availability and price stability of sugar. Under the restricted regime, the exports of sugar will be permissible only with prior approval of Directorate of Sugar, Department of Food and Public Distribution. The export restriction would not be applicable to sugar exported to USA under TRQ category and to EU under CXL quota. While this export restriction on sugar was initially put in place for the period 1 June 2022-31 October 2022 and has been extended till 31st October 2023 or further orders, vide DGFT notification dated 28 October 2022.

Under the restricted export regime, on 5 November 2022, Government has announced sugar export quota for export of sugar up to 60 lakh tonnes during 2022-23 season w.e.f. 1 November, 2022 till 31 May 2023. Mill-wise export quota for all sugar mills in the country has been announced for this purpose. These mill-wise export quotas have been fixed in an objective manner at 18.23 percent of the average production share of a sugar mill in the last three years. In addition, mills have been given the flexibility to surrender the quota partially/ fully or swap their export quota with domestic quota of another sugar mill within 60 days of the said order. This system would ensure lesser burden on logistics system of the country as swapping system would reduce the need to transport sugar from distant locations to ports for exports. The

sugar export policy has thus attempted to balance the interests of consumers, farmers and sugar mills to develop a sustainable value chain of sugar complex.

Evolution of Import Policy

Due to fall in sugar production in 2008-09 and 2009-10 seasons, import of raw sugar was allowed into the country at zero import duty under Advance Authorization Scheme (AAS) from 17 April, 2009 to 30 June 2012 to augment domestic availability of sugar. The import duty was thereafter increased from zero to 10 percent in July 2012, and further to 15 percent in July 2013. Due to surplus stocks of sugar in the country and to check imports in the later years, the import duty on sugar was subsequently increased from 15 percent to 25 percent in August 2014 and further to 40 percent in April 2015. At the same time, in order to address regional production gaps and to maintain domestic prices at reasonable levels, Government also allowed import of five lakh tonnes of raw sugar at zero duty under OGL for eastern, southern and western zones with quantity and port restrictions. However, sugar exported under Advance Authorization Scheme (AAS) was exempted from import duty vide notification dated 6 July 2016.

Thereafter, in July 2017, owing to steep fall in international prices and to discourage cheaper imports, the import duty on sugar was raised from 40 percent to 50 percent w.e.f. 10 July 2017 and further to 100 percent w.e.f. 06th February, 2018. The import duty on sugar continues to be at the same level at present.

Regulations in Sugar Industry

With the amendment of the Sugarcane (Control) Order, 1966 on 22.10.2009 and the concept of Statutory Minimum Price (SMP) of sugarcane was replaced with the 'Fair and Remunerative Price (FRP) of sugarcane for 2009-10 and subsequent sugar seasons. The cane price announced by the Central Government is decided on the basis of the recommendations of the Commission for Agricultural Costs and Prices (CACP) after consulting the State Governments and associations of sugar industry. The amended provisions of the Sugarcane (Control) Order, 1966 provides for fixation of FRP of sugarcane having regard to the following factors:

- a. Cost of production of sugarcane;
- b. Return to the growers from alternative crops and the general trend of prices of agricultural commodities;
- c. Availability of sugar to consumers at a fair price;
- d. Price at which sugar produced from sugarcane is sold by sugar producers;
- e. Recovery of sugar from sugarcane;
- f. The realization made from sale of by-products viz. molasses, bagasse and press mud or their imputed value and
- g. Reasonable margins for the growers of sugarcane on account of risk and profits.

Under the FRP system, the farmers are not required to wait till the end of the season or for any announcement of profits by sugar mills or the Government. The new system also assures margins on account of profit and risk to farmers, irrespective of the fact whether sugar mills generate profit or not and is not dependent on the performance of any individual sugar mill.

In order to ensure that higher sugar recoveries are adequately rewarded and considering variations amongst sugar mills, the FRP is linked to a basic recovery rate of sugar, with a premium payable to farmers for higher recoveries of sugar from sugarcane.

Accordingly, FRP for 2021-22 sugar season has been fixed at 290 per quintal linked to a basic recovery of 10% subject to a premium of 2.90 per quintal for each 0.1% increase of recovery over and above 10% and reduction in FRP at the same rate for each 0.1% decrease in the recovery rate till 9.5%. With a view to protect interest of farmers, the Government has decided that there shall not be any deduction in case

where recovery is below 9.5%; such farmers will get 275.50 per quintal for sugarcane in the current season.

De-regulation of sugar sector on the recommendations of Dr. Rangarajan Committee report

In the year 2013-14, the Central Government considered the recommendations of the committee headed by Dr. C. Rangarajan on de-regulation of sugar sector and decided to discontinue the system of levy obligations on mills for sugar produced after September, 2012 and abolished the regulated release mechanism on open market sale of sugar. The de-regulation of the sugar sector was undertaken to improve the financial health of sugar mills, enhance cash flows, reduce inventory costs and also result in timely payments of cane price to sugarcane farmers. The recommendations of the Committee relating to Cane Area Reservation, Minimum Distance Criteria and adoption of the Cane Price Formula have been left to State Governments for adoption and implementation, as considered appropriate by them.

Government Initiatives

After the implementation of National Food Security Act (NFSA), 2013 in the entire country, there is no identified category of BPL under the NFSA, 2013; however, the Antyodaya Anna Yojana (AAY) beneficiaries are clearly identified. The Government has reviewed the sugar subsidy scheme and has decided to give access to consumption of sugar as a source of energy in diet, for the poorest of the poor section of the society i.e., AAY families.

The Central Government has been reimbursing a fixed subsidy of Rs. 18.50 per kg @ Rs. 1 kg per month per AAY family to participating States/ UTs. The States/ UTs are also allowed either to absorb the additional cost on account of handling, transportation and dealer's commission or pass it on to the consumer by adding it to the Retail Issue Price (RIP) of Rs. 13.50 per kg under the Public Distribution System (PDS).

Presently 24 states are participating in the scheme and about 1.87 crore AAY families are getting benefit under this scheme for which about 2.25 Lakh tons sugar is being distributed.

DISTRIBUTION OF SUGAR THROUGH PUBLIC DISTRIBUTION SYSTEM (PDS) FOR ANTYODAYA ANNA YOJANA (AAY) FAMILIES

After the implementation of National Food Security Act (NFSA), 2013 in the entire country, there is no identified category of BPL under the NFSA, 2013; however, the Antyodaya Anna Yojana (AAY) beneficiaries are clearly identified. The Government has reviewed the sugar subsidy scheme and has decided to give access to consumption of sugar as a source of energy in diet, for the poorest of the poor section of the society i.e. AAY families.

The Central Government has been reimbursing a fixed subsidy of Rs 18.50 per kg @ 1 kg per month per AAY family to participating States/ UTs. The States/ UTs are also allowed either to absorb the additional cost on account of handling, transportation and dealer's commission or pass it on to the consumer by adding it to the Retail Issue Price (RIP) of Rs.13.50 per kg under the Public Distribution System (PDS).

Presently 25 states are participating in the scheme and about 1.89 crore AAY families are getting benefit under this scheme for which about 2.27 Lakh tones sugar is being distributed.

ETHANOL BLENDED PETROL PROGRAMME (EBP PROGRAMME)

In order to find a permanent solution to address the problem of excess sugar, Government is encouraging sugar mills to divert excess sugarcane to ethanol. Government has fixed target of 10% blending of fuel grade ethanol with petrol by 2022 which has been achieved successfully & 20% blending of fuel grade

ethanol with petrol by 2025. In order to achieve the 20% blending target by 2025, about 1350 crore liters of ethanol will be required (1016 crore liters for blending and 334 crore liters for other industrial uses).

Till year 2014, ethanol distillation capacity of molasses-based distilleries was less than 200 crore litres. Supply of ethanol to OMCs was only 38 crore litres with blending levels of only 1.53% in ethanol supply year (ESY) 2013-14. However, in past 8 years, due to the policy changes made by the Government, the capacity of molasses-based distilleries has been almost triple and are currently at 639 crore litres. Capacity of grain-based distilleries is presently about 328 crore litres.

Production of fuel grade ethanol and its supply to OMCs has increased by almost 8 times from 2013-14 to 2021-22. In the ESY 2020-21, 302.3 crore litres of ethanol was supplied by distilleries to OMCs thereby achieving 8.1% blending. In ESY 2021-22, against the targeted blending of 10%, about 408 crore litres ethanol has been supplied to OMCs was thereby achieving 10.02% blending which is more than 100% of the target for ESY 2021-22 & 50% of the overall target for 2025.

To augment the ethanol production capacity in the country, Government of India has notified various ethanol interest subvention schemes from July' 2018 to April'2022, to encourage sugar and grain based distilleries to enhance their distillation capacities for which Government is facilitating them to avail loans from banks for which interest subvention @ 6% or 50% of the interest charged by the banks whichever is lower is being borne by Government for the period of five years including one year of moratorium. A total of 1125 ethanol projects (both new distillery as well as expansion) with capacity of 3934 crore liters and expected loan amount of about Rs. 103202 crores have been approved (853 in the schemes notified from 2018-21 and 272 in new scheme notified on 22.04.2022). Under the schemes, up to 31.12.2022 loans amounting to about `19495 crores have been sanctioned to 233 projects with additional capacity creation of 935 crore liters. Out of these sanctioned loan amounting to `9970 crores have been disbursed to 203 projects with additional capacity of about 722 crore liters.

With a view to support sugar sector and in the interest of sugarcane farmers, the Government has also allowed production of ethanol from B-Heavy Molasses, sugarcane juice, sugar syrup and sugar. Government is also encouraging distilleries to produce ethanol from food grains such as Damaged Food Grains (DFG), maize & rice available with FCI.

Government has also been fixing remunerative ex-mill price of ethanol derived from C-heavy & B-heavy molasses, ethanol derived from sugarcane juice/ sugar/ sugar syrup, ethanol produced from food grains such as Damaged Food Grains (DFG), maize & FCI rice. The prices of ethanol from various feed-stocks current ESY 2022-23 (Dec-Oct) are as under:

(in

Rs. per litre)

Feed stock	ESY 2022-23 (Dec-Oct)
Sugarcane juice	65.61
B- Hy molasses	60.73
C-Hy molasses	49.41
Damaged food grains	55.54
Rice from FCI	58.50
Maize	56.35

Additionally, GST as per actuals & Transportation will also be payable.

Note: The price of ethanol from sugarcane juice, B-Hy & C-Hy molasses is fixed by the Government whereas prices of ethanol from damaged food grains/FCI rice/maize are fixed by the OMCs.

In sugar seasons 2019-20 & 2020-21 about 9.26 LMT & 22 LMT of sugar was diverted to ethanol. In previous sugar season 2021-22, about 36 LMT of excess sugar was diverted to ethanol. In current ESY 2022-23 (Dec-Oct), it is expected that about 45-50 LMT of sugar would be diverted for ethanol

production. To meet the target of 20% set under EBP Programme, about 60 LMT sugar will be diverted by 2025 which would solve the problem of high inventories of sugar, improve liquidity of mills thereby help in timely payment of cane dues of farmers.

Overview and History

Our Company was incorporated as a private limited company namely "Dollex Agrotech Private Limited" under the Companies Act, vide certificate of incorporation dated June 10, 2013 issued by Registrar of Companies, Gwalior bearing corporate Identity Number U15311MP2013PTC030914. Our company was converted into a Public Limited Company in pursuance of a special resolution passed by the members of our Company at the Extra Ordinary General Meeting held on April 25, 2022 & name of our Company changed from 'Dollex Agrotech Private Limited' to 'Dollex Agrotech Limited' & Registrar of Companies, Gwalior issued new Certificate of incorporation dated May 20, 2022. The registered office of the company is situated at 205, Naroli Arcade 19/1, Manorama Ganj, Palasia Square, Indore, Madhya Pradesh-452001, India and our plant is situated at Village Erai, Tehsil Badoni Khurd, Dist. Datia, Madhya Pradesh- 475686. Dollex Agrotech Limited was founded by Mr. Mehmood Khan & Mrs. Munni Khan in year 2013.

Our Company is engaged into the business of manufacturing & trading of sugar with captive power cogeneration capabilities. Our promoter, Mr. Mehmood Khan possesses rich experience of sugar industry of nearly about fifteen years. In 2006, Mr. Mehmood Khan, one of our promoters, participated in a tender floated by Govt. of Maharashtra for a sugar unit on lease at Nanded, Maharashtra and was allotted the unit for a period of 6 years. After getting rich experience in sugar industry, he started mentoring other companies engaged in sugar manufacturing. Thereafter, he decided to set up a sugar manufacturing plant, in the name of the company 'Dollex Industries Limited' (BSE listed company) which was later on merged with an unlisted company, 'Parvati Sweetners and Power Ltd', in 2018, and our promoters sold their shareholding in that Company & currently has no control neither by shareholding nor by any managerial rights.

As the production of sugarcane required ample amount of time, the company started its cane development process since Incorporation. Thereafter, the promoters started gathering resources like plant and machinery, key managerial personnel etc. for establishing and operating sugar manufacturing plant till the year 2017. In the year 2018, the Company then started its operations of Sugar manufacturing, from sugarcane along with co-generation capabilities in Indore, Madhya Pradesh. Our plant is situated at Village Erai, Tehsil Badoni Khurd, Dist. Datia, Madhya Pradesh-475686 and has crushing capacity of 2500 TCD. We have received in-principle approval from Department of Food & Public Distribution of Government of India for establishing distilleries of 200 KLPD capacity. In addition to sugar, we also produce and sell its byproducts such as mollasses, pressmud and bagasse. The bagasse is used to generate power. Further, the company is into captive power generation with a capacity of 3 MW for its own use and not in commercial power generation and distribution as on date. The power is generated from bagasse to run our plant at Datia.

We have achieved the turnover of Rs. 11,044.97 and a Profit after tax of Rs. 687.37 Lakhs in Financial year 2022-2023 which was an increase of Rs. 262.42 as compared to last year, as per the Restated Financials Statements beginning on page no. 90. After achieving such numbers, we are planning to step into the business of Ethanol production under EBP Program by the Ministry of Petroleum and Natural Gas. Ethanol consumption is expected to rise in the future when the commercial blending of ethanol with petrol (for producing gasohol) takes off. In the long term, however, the supply is also expected to increase as more sugar manufacturers are expected to set up primary distilling facilities and as new sugar mills are expected to come up in the form of integrated plants with cogeneration.

The Company manufactures & trades sugar in wholesale & sell it in the package of 50 kgs to anyone who wants to buy it, therefore we have no distributor as on date & we sell sugar to our clients directly without involving any distributor. The revenue from 'Manufacturing & Trading' segment includes the revenue from sale of sugar, which is

processed and manufactured at our plant. However, revenue from 'Trading' segment includes revenue from sale of ready-made sugar which is directly procured from other manufacturers. It doesn't involve any processing at our plant.

Our revenues from operations for Fiscals 2023, 2022 and 2021 were ₹ 11,044.97 lacs, ₹ 7,940.11 lacs and ₹ 7718.79 lacs, respectively. Our EBITDA for the Fiscals 2023, 2022 and 2021 were ₹ 544.88 lacs, ₹ 197.65 lacs and ₹ 0.0109 lacs, respectively. Our profit after tax for Fiscals 2023, 2022 and 2021 were ₹ 610.48 lacs, ₹ 326.90 lacs and ₹ 167.42 lacs respectively.

OUR PRODUCTS

1	<p>Jaggery powder</p> <p>Jaggery is an unrefined sugar product. It's sometimes referred to as a "non-centrifugal sugar," because it's not spun during processing to remove the nutritious molasses. About 70% of the world's jaggery production takes place in India, where it is commonly called "gur."</p> <p>We, in our plant produce jaggery powder as one of our primary products.</p>	
2	<p>Sugar</p> <p>Sugar is physically extracted from liquid jaggery. Sugar is considered as whole food that provides necessary vitamins and fiber and is very essential food item in every Indian household. We, in our plant produce two types:</p> <p>1. Refined Sugar It is refined and washed so that it has a white appearance and no molasses flavour. It contains 99.9% sucrose. This type of sugar is widely used in households.</p> <p>2. Pharma-grade Sugar This is the more pure form of sugar. It is mainly used in preparation of pharmaceutical and food products.</p>	
3	<p>By-Products</p> <p>Molasses and bagasse are a by-product of the sugar industry.</p> <p>1. Molasses Every ton of processed cane will lead to the production of molasses, the by-product from which no additional sugar can be obtained by further crystallisation. Molasses still contains a substantial amount of sugar.</p> <p>2. Bagasse Bagasse are used in captive plant for power generation.</p>	

4	<p>Press mud</p> <p>Sugarcane press mud is the solid residue produced after filtration of sugarcane juice. It is also called sugarcane filter press mud. It can be used as a bio manure in agricultural activities.</p>

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Consolidated FDI Policy and FEMA. The FDI Policy prescribes the limits and conditions subject to which foreign investment can be made in different sectors of the Indian economy and FEMA regulates the precise manner in which such investment may be made.

The government bodies responsible for granting foreign investment approvals are the concerned ministries/departments of the Government of India and the RBI. Pursuant to the press release dated May 24, 2017, the Union Cabinet phased out the FIPB and it was replaced by the Foreign Investment Facilitation Portal (**FIFP**) to speed up the FDI inflow and to increase the transparency in the FDI approvals in the country. The DIPP issued the Standard Operating Procedure (SOP) for Processing FDI Proposals on June 29, 2017 (the "**SOP**"). The SOP provides a list of the competent authorities to grant approvals for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under the automatic route but which required Government approval earlier as per the extant policy during the relevant period, the concerned Administrative Ministry/Department shall act as the competent authority (the "**Competent Authority**") for the grant of post facto approval for foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP will identify the Competent Authority.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("**FDI**") through press notes and press releases. The DIPP, has issued a consolidated FDI Policy DPIIT File Number 5(2)/2020-FDI Policy Dated the October 15, 2020 ("**FDI Policy 2020**"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI policy issued by the DIPP that were in force till that date. The Government of India proposes to update the consolidated circular on FDI policy once every year and therefore, the FDI Policy 2020 will be valid until the DIPP issues an updated circular.

Under the FDI Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to 100% without any prior approvals, however the foreign investor must follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment ("**FDI**") and approval from the Government of India will now be handled by the **FIFP**.

The transfer of shares between an Indian resident and a non-resident does not need prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA, and the transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.
