SUMMARY OF OUR INDUSTRY

Just over two years after COVID-19 caused the deepest global recession since World War II, the world economy is again in danger. This time it is facing high inflation and slow growth at the same time. Even if a global recession is averted, the pain of stagflation could persist for several years unless major supply increases are set in motion. Amid the war in Ukraine, surging inflation, and rising interest rates, global economic growth is expected to slump in 2022. Several years of above-average inflation and below-average growth are now likely, with potentially destabilizing consequences for low- and middle-income economies. It’s a phenomenon stagflation that the world has not seen since the 1970s.

The forecasts reflect a sizable downgrade to the outlook: global growth is expected to slow sharply from 5.7 percent in 2021 to 2.9 percent this year. This also reflects a nearly one-third cut to our January 2022 forecast for this year of 4.1 percent. The surge in energy and food prices, along with the supply and trade disruptions triggered by the war in Ukraine and the necessary interest rate normalization now underway, account for most of the downgrade.

SECTION III- RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Prospectus, including the risks and uncertainties summarized below, before making an investment in our Equity Shares. The risks described below are relevant to the industries our Company is engaged in, our Company and our Equity Shares. To obtain a complete understanding of our Company, you should read this section in conjunction with the chapters titled “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page numbers 89 and 184, respectively, of this Draft Prospectus as well as the other financial and statistical information contained in this Draft Prospectus. Prior to making an investment decision, prospective investors should carefully consider all of the information contained in the section titled “Financial Information, as Restated” beginning on page number 151 of this Draft Prospectus.

If any one or more of the following risks as well as other risks and uncertainties discussed in the Draft Prospectus were to occur, our business, financial condition and results of our operation could suffer material adverse effects, and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of investment. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is therefore subject to a legal and regulatory environment that may differ in certain respects from that of other countries.

This Draft Prospectus also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Prospectus. These risks are not the only ones that our Company face. Our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify financial or other implication of any risks mentioned herein.

Materiality

The Risk factors have been determined based on their materiality, which has been decided based on following factors:

1. Some events may not be material individually but may be material when considered collectively.
2. Some events may have an impact which is qualitative though not quantitative.
3. Some events may not be material at present but may have a material impact in the future.

Classification of Risk Factors

INTERNAL & BUSINESS RISK FACTORS

1. *Our present promoters of the Company are first generation entrepreneurs.*

Our present Promoters are first generation entrepreneurs. Their experience in managing and being instrumental in the growth of our Company is limited to the extent of their knowledge and experience and we cannot assure that this will not affect our business growth.

2. *Sugarcane is the principal raw material used for the production of sugar. Any fall in quality or quantity of sugarcane may adversely affect our business operations.*

Our business largely depends on the availability of sugarcane and any shortage of sugarcane may adversely affect our financial condition and business operations. We do not own any land for sugarcane cultivation and we have to procure it from independent farmers. We have been allotted 7600 Acres of land from the government from where we could get the sugarcane produce from the farmers and we purchase all of our sugarcane directly from sugarcane growers' societies and independent farmers. Under Indian law, we are bound to purchase all sugarcane grown within our reserved area, irrespective of the prices of sugar and sugarcane. A reserved area will differ for each sugar mill but is subject to a minimum distance of 15 kilometers between any two sugar mills pursuant to Indian law.

For the year ended March 31, 2022 and March 31, 2021 sugarcane comprised of 56.25% and 54.31% of our raw materials costs, respectively. A variety of factors beyond our control may contribute to a shortage of sugarcane in any given harvest period, such as non availability of good seeds, bad weather conditions, less rainfall etc. If we fail to procure good quality sugarcane, we may not be able to maintain our production and our business, operational and financial results may be adversely affected.

3. *Sugarcane grown within our reserved areas may be sold to other manufacturers instead of us and the farmers are not required to grow sugarcane in that area and may cultivate other crops.*

The government has allotted us a certain area of agricultural land producing sugarcane. We are bound to purchase the sugarcane produce from that reserved area of land.

However, it might be possible that sugarcane grown in our reserved areas may-be sold to other sugar manufacturers. In off-peak time, our Company support the farmers to cultivate sugarcane & try to get them from farmers by paying handsome amount. If the farmers are able to sell it at a higher price or better payment terms for sales from other manufacturers then it might be possible that sugarcane will be sold to some other manufacturer & diversion of sugarcane within our reserved areas may reduce supply of the sugarcane available to us and may adversely affect our financial condition and results of operations.

Also, the farmers within reserved areas have no legal or contractual obligation to cultivate sugarcane and may instead grow other crops. Several factors may prompt farmers to grow crops other than sugarcane in our reserved area, including their ability to cultivate more profitable crops and concerns in relation to late payments from sugar manufacturing companies to farmers. This is further elevated in cases where the payment cycles to farmers are disrupted due to low margins. If more farmers within our reserved areas cultivate other crops, or otherwise limit their cultivation of sugarcane, we may have a shortage of raw material. Any reduction in the supply of sugarcane may adversely affect our financial condition and results of operations.

4. Inability to set/control the cost of sugarcane or the selling price of sugar.

Our profitability depends significantly on the cost of our primary raw material, sugarcane, and the selling price of sugar. We are neither able to set the cost of sugarcane nor the selling price for our sugar. Some of the main reasons that contribute to fluctuations in the margin between our raw material cost and the selling price of our sugar are set forth below.

The price we pay for sugarcane is determined by the government of the state of Madhya Pradesh where our mills are located and we may be adversely affected by rising sugarcane prices, particularly in the event of a decrease in the price of sugar.

5. Our sugar recovery rates depend on how efficiently we process sugarcane delivered to us.

High sucrose levels in sugarcane results in better sugar recovery rates. Sucrose levels are the highest immediately after harvesting, and decrease with the passage of time. Specifically, a delay of more than 24 hours in crushing the sugarcane results in a reduction in the sucrose level of such sugarcane, decreasing our sugar recovery rate. Accordingly, our sugar recovery rates depend upon how efficiently we process the sugarcane delivered to us. Any delay in crushing the sugarcane delivered to us, or any adverse change in the expected volume or delivery schedule of sugarcane being delivered to us, results in reduction of sucrose content of the sugarcane supplied to us and as such, adversely affects our results of operations.

6. Adverse weather conditions, crop disease and certain sugarcane crop varieties grown by farmers may adversely affect sugarcane crop yields and sugar recovery rates for any given harvest.

Our sugar production depends on the volume and sucrose content of the sugarcane that is supplied to us. Crop yields and sucrose content depend primarily on the variety of sugarcane grown and is impacted by any crop disease and weather conditions such as rainfall and temperature, which vary. Adverse weather conditions have caused crop failures and reduced harvests and resulted in volatility in the sugar and industrial alcohol industries and consequently in our operating results. Flood, drought or frost can adversely affect the supply and pricing of the agricultural commodities that we sell and use in our business. For instance, in SS 2016, the yield of our sugarcane reduced due to low levels of rainfall in the state. There can be no assurance that future weather patterns, potential crop disease or the cultivation of certain sugarcane crop varieties will not reduce the amount of sugarcane or sugar that we can recover in any given harvest. Any reduction in the amount of sugar recovered could have a material adverse effect on our results of operations.

7. Our power generation business is substantially bagasse-based which is derived from sugarcane. Any constraint on the availability of sugarcane may adversely affect our power generation.

The by-products of sugar production are bagasse and molasses. Our power generation business is primarily bagasse based. Since our access to external supply of raw material is dependent on prevailing sugar cycles, any constraint in the availability of sugarcane may affect the production and availability of bagasse and molasses. This may affect the current or future business of our power generation plants and/or chemical production units / distilleries, and as such adversely affect our financial condition and results of operations.

8. Our Company has negative cash flows from its operating and its investing activities in the current and past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

Our Company had negative cash flows from our operating, investing & financing activities in the previous years as per the Restated Financial Statements and the same are summarized as under.

(Amount in Rs. Lakhs)

Net Cash Generated from	For the period ended on June 30, 2022	For the year ended on March 2022	For the year ended on March 2021	For the year ended on March 2020
Operating Activities	(555.29)	863.23	24.22	921.11
Investing Activities	(0.45)	261.60	(212.34)	(836.47)
Financing Activities	52.28	(826.44)	601.79	1,539.43

9. Inability to set/control the cost of sugarcane or the selling price of sugar

Our profitability depends significantly on the cost of our primary raw material, sugarcane, and the selling price of sugar. We are neither able to set the cost of sugarcane nor the selling price for our sugar. The price we pay for sugarcane is determined by the government of the state of where our mills are located and we may be adversely affected by rising sugarcane prices, particularly in the event of a decrease in the price of sugar.

We purchase all of the sugarcane that we use in our production of sugar directly from the independent sugarcane growers and sugarcane growers' societies located in our reserved areas. The state government, where all our mills are located, annually declares the sugarcane procurement price which is known as the State Advised Price ("SAP"). The SAP is a minimum price we must pay to sugarcane growers for sugarcane. The determination of the SAP is not related to the prevailing market price of sugar and is only loosely related to the quality of sugarcane. For example, political motives may result in the declaration of higher SAPs. Rising SAPs, particularly if sugar prices remain stable or decrease during the same period, may adversely affect our results of operations and financial condition.

10. We operate in the sugar industry where the market price for our products is cyclical, while the price at which we procure our raw materials is regulated. These pricing conditions cause our margins to fluctuate and may affect our financial condition, cash flows and results of operation.

The sugar industry has historically been cyclical and sensitive to changes in supply and demand. The market in India has experienced periods of limited supply, causing sugar prices and industry profit margins to increase, followed by periods of excess production that result in oversupply, causing declines in sugar prices and industry profit margins. For additional details, please see "Industry" on page 78 of this Placement Document. Fluctuations in demand and supply and as a result, the price of our products, occur for various reasons, including:

- changes in the availability and price of our primary raw material, sugarcane;
- variances in the production capacities of our competitors; and
- the availability of substitutes for the sugar products that we produce.

Further, we operate in a seasonal industry in which the crushing season for sugarcane, typically lasts for around six months in a year. This requires us to generate large amounts of working capital during such

crushing seasons in order to procure our raw material. Accordingly, the cyclical nature of the sugar industry may cause our margins to fluctuate and adversely affect our cash flows, hampering our ability to finance our working capital requirements in a timely manner or at all. Sugar production in India is currently at low levels as compared to the consumer demand which continues to rise because of population growth, rising income levels, and a shift away from traditional sweeteners such as gur and khandsari to sugar. Stronger demand may result in higher prices for sugar. Profitable sugar manufacturers may make prompt payments to farmers who may in turn switch to cultivating sugarcane rather than other crops which have become relatively less profitable. An increase in sugarcane cultivation may lead to an increase in sugar production and a subsequent reduction in sugar prices, which may materially and adversely affect our results of operation and our financial condition.

11. The prices we are able to obtain for the sugar that we produce depend largely on prevailing market prices. These market conditions, both domestically and internationally, are beyond our control.

The wholesale price of sugar has a significant impact on our profits. Like other agricultural commodities, sugar is subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. In addition, a material amount of total worldwide sugar production is traded on commodity exchanges and is thus subject to speculation, which could affect the price of sugar worldwide. Any prolonged decrease in sugar prices could have a material adverse effect on us and our results of operations.

12. Our inability to supply ethanol to OMCs will lead to defaults under our existing contracts.

Failure to maintain the commitments, specifically with regard to the quantity of ethanol to be supplied to OMCs as per our arrangements mentioned on page no. 94 with OMCs under supply agreements shall result in significant penalties being levied on us under such agreements. Further, our inability to fulfil our contractual obligations may restrict our ability to procure such contracts with OMCs in the future. Accordingly, any adverse effect on our ethanol operation, which results in a default under such contracts, may affect our financial condition, cash flows and results of operations.

13. We have not paid dividend to our equity shareholders during the financial years ended March 31, 2022, March 31, 2021 and March 31, 2020. Our ability to pay dividends in the future will be affected by our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on the earnings, financial condition and capital requirements of our Company. Our business is capital intensive as we are required to innovate from time to time to increase margins, which may result in additional capital expenditure. Further, we may not be able to distribute dividends in certain circumstances such as default in payment of interest and/or principal, amongst others, based on certain of our high cost financing arrangements. We may be unable to pay dividends in the near or medium-term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our projects, financial condition and results of operations.

14. We face significant competition in our business from Indian sugar manufacturers, which may adversely affect our profitability.

The sugar industry is highly competitive. Domestically, we compete with numerous small to medium size producers. Despite increased consolidation, the Indian sugar industry remains highly fragmented. Our major competitors in India are sugar mills based in the Madhya Pradesh and nearby states. Further, we also

face competition from the sugar mills based in the Indian state of Maharashtra. Further, excess sugar stocks may be dumped by competitors from other states into the northern India region markets, leading to excess supply and price drop.

15. We are substantially dependent on our revenue from sugar.

We are substantially dependent on our revenues from sale of sugar and any decline in our revenues from sugar will adversely impact our profit margins. For example, our revenue from operations from our Sugar Segment during Fiscal Year 2022 and 2021 amounted to 7600.51 and 7060.05 respectively. Although our strategy is to actively grow our other lines of business, our sugar business will continue to constitute a significant portion of our revenues. Any decline in our sugar revenues will adversely affect the results of our operations.

16. Classification of our Promoters as ‘Promoter’ in Parvati Sweetners and Power Limited’.

Our promoters, Mr. Mehmood Khan and Mrs. Munni Bee, have been disassociated from the listed entity ‘Parvati Sweetners and Power Limited’ since 2018 and have no voting and/or managerial rights now. However, our Promoters, are classified as ‘Promoters’ in their shareholding pattern. The promoters have inadvertently not made any request for reclassification of their category. Accordingly, any fine/ penalty from any default, non compliance committed by the company, may affect our promoters and thus, may have adverse effect on the business of our company.

17. Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital or pay out debts, could adversely affect our operations.

Being into retail business, there exist substantial requirement of working capital and financing in the form of fund based working capital facilities to meet our requirements. The details of our working capital for the period ended June 30, 2022 and year ended March 31, 2022, March 31, 2021 & March 31, 2020, March 31, 2019 are as under which is showing continuous increase:

A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. The significant amount of working capital and major portion of our working capital is utilized towards inventories and trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

18. We do not own the premises in which our registered office is located and the same is on lease arrangement. Any termination of such lease/license and/or non-renewal thereof and attachment by Property Owner could adversely affect our operations.

Our Registered Office is presently located at 205, Naroli Arcade 19/1, Manorama Ganj, Palasia Square, Indore Madhya Pradesh 452001. The registered office is not owned by Company, it is owned by Mr. Mehmood Khan, the Promoter himself.

The premises have been taken on lease basis for a period of five (5) years commencing from 01/07/2022 from Mr. Mehmood Khan who is promoter/Director of our company.

Upon termination of the lease, we are required to return registered office premises to the Lessor/Licensors, unless it is renewed. There can be no assurance that the term of the agreements will be renewed on commercially acceptable terms and in the event the Lessor/Licensors terminates or does not renew the agreements, we are required to vacate our registered office business where administrative activities are carried out. We may be required to identify alternative premises and enter into fresh lease or leave and license agreement at less favorable terms and conditions. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability.

19. Our results of operations could be adversely affected by a disruption of operations at our manufacturing facilities.

We own and operate one sugar production facilities located at Datia. All of these facilities are subject to operational risks, including:

- equipment failure;
- failure to comply with applicable regulations and standards;
- obtaining and maintaining necessary licenses;
- raw material and/or energy supply disruptions;
- labour force shortages or work stoppages; and
- natural disasters.

While our facilities are insured against standard risks such as fire, there can be no assurance that the proceeds available from our insurance policies would be sufficient to protect us from possible loss or damage. In addition, we do not currently have business interruption insurance. As a result, a significant disruption in operations at any of these production facilities resulting from the events above or other events may adversely affect our business, financial condition and results of operations.

20. Our crushing operations are subject to availability of water.

We operate in Datia, Madhya Pradesh. Our crushing operations at the sugar mills are subject to the availability of ample amounts of water in the respective regions. For instance, low rainfall and droughts in the state of Madhya Pradesh has resulted in the state government of Madhya Pradesh requiring sugar mills in the state to curtail their operations. Non-availability of water at any of our units would result in us not

being able to carry out our crushing operations efficiently or at all and accordingly, adversely affect our revenues, financial condition and results of operation.

21. We are highly dependent on our cane development initiative to increase our raw material.

Under Indian law, we are required to purchase all of our raw material (sugarcane) from within our reserved area. The restriction on our ability to procure sugarcane from beyond our reserved area means that the only way for us to increase the volume of raw material procured by us, is to improve the yield of the sugarcane grown within our reserved areas. As a result, we focus on developing the quality of the sugarcane, to ensure better recovery rates; and the quantity of sugarcane, to increase the volume of raw material accessible to us. Our inability to effectively manage our cane development initiative and improve the yield of the sugarcane in our reserved areas will affect the volume of raw material that we procure, our revenues, financial condition and results of operation.

22. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.

Our Promoters' average cost of acquisition of Equity Shares in our Company is lower than the Issue Price of the shares proposed to be offered through this Draft Prospectus. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer to page no. 20 of this Draft Prospectus.

23. In addition to normal remuneration, other benefits and reimbursement of expenses, some of our Directors (including our Promoter) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, any amount received towards rent from company

We cannot assure you that our Directors or promoters would always exercise their rights as Shareholders to the benefit and best interest of our Company. As a result, our Directors or Promoter will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting.

For details relating to benefits and reimbursement of expenses to some of our directors, please refer to section title "Our Management", "Our Promoters", "Our Promoters' Group" and Annexure VIII- "Related Party Transaction in chapter titled "Restated Financial Statement" on page nos. 121, 136, 140 & 151 respectively of this Draft prospectus.

24. Our Company has entered into certain related party transactions and may continue to do so in the future.

Our Company has entered into related party transactions with our Promoter, Directors and the Promoter Group aggregating Rs. 1,686.91 for the last financial year ended March 31, 2022. While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on

our financial condition and results of operation. For details, please refer to “Annexure VIII- Related Party Transactions” on page no. 180 of this Draft Prospectus.

Such non-compliances/delay Compliances/ erroneous filing/ Non-Filing/ Non Registration may incur the penalties or liabilities which may affect the results of operations and financial conditions.

26. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives.*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our sales channel and to implement systems capable of effectively accommodating our growth. However, we cannot assure that any such employees or franchisee partners will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analysis of market conditions and other data or the strategies that we may use in future to use will be successful under various market conditions.

27. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Issue which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoters and Promoter Group will collectively own 71.69% of our post issue equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

28. *Our success depends largely on our senior management and our ability to attract and retain our key personnel.*

Our success depends on the continued services and performance of our senior management and sales agents. Competition for senior employees and sales agents in the industry is intense and we may not be able to retain our existing team members or attract and retain new team members in the future. The loss of any member of our key team may adversely affect our business, results of operations and financial condition. We do not maintain keyman’s life insurance for our Promoters, senior members of our management team or other key personnel.

29. The trademark of our Company have not been registered under the Act.

We have filed applications for registration of trademarks related to our Company, which has been under the process of registration under Trade Marks Act, 1999. The complete details of Trademark are given in Chapter “Our Business” beginning on page no. 89 of this Draft Prospectus. In the event we are not able to obtain registrations in respect of such trademark applications, we may not be able to obtain statutory protections available under the Trade Marks Act, 1999, as otherwise available for registered logos and trademarks. Consequently, we are subject to the various risks arising out of the same, including but not limited to infringement or passing off our name and logo by a third party.

30. Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.

We employ a significant number of employees. As on the date of Draft Prospectus we had 48 permanent employees on our rolls.

In addition, we employ seasonal workers, who are employees of the Company and work only during the sugarcane crushing season. Historically, we have not experienced any significant strikes or other labour disputes. However, there can be no assurance that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may adversely affect our business and results of operations.

We are also dependent on the farmers, that we are associated with, within our reserved area and if they experience disruptions related to their workforce, including strikes and work stoppages, it may have an adverse effect on our business and results of operations.

31. India’s infrastructure may be less developed than that of many developed nations.

India’s infrastructure may be less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or other public facilities could disrupt our normal business activity. Any material deterioration of India’s infrastructure, including technology and telecommunications, adds costs to doing business in India. These problems could interrupt our business operations and reduce demand for our services, which could have an adverse effect on our business and results of operations.

32. Terrorist attacks, communal disturbances and regional conflicts in South Asia may have a material adverse effect on our business and on the market for securities in India.

Terrorist attacks, whether in India or another country may adversely affect Indian and worldwide financial markets. These acts may also result in a loss of business confidence and have other consequences that could adversely affect our business, results of operations and financial condition. Some parts of India have experienced communal disturbances and riots during recent years. If such events recur, our business and financial condition may be adversely affected.

South Asia has, from time to time, experienced instances of civil unrest. Military activity or terrorist attacks in the future could adversely affect the Indian economy, and the financial condition and results of operations of Indian companies, including us, which would have an adverse effect on the trading price of our Equity Shares.

33. Certain Agreements, deeds or licenses may be in the previous name of the company

Our certain agreements, deeds or licenses may be in the name of the erstwhile name of the company Dollex Agrotech Private Limited. In case we fail to change the name in the agreements, deeds or licenses it may cause adverse effect on Our Company's business & operations.

34. Our Company has availed loan facility amounting to Rs. 2298.40 Lakhs that may be recallable on demand by the lender at any point of time.

As on June 30, 2022, our Company has unsecured loans amounting to Rs. 2298.40 lakhs from unsecured lenders that are repayable on demand to the relevant lender. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.

For further details of unsecured loans of our Company, please refer the chapter titled Financial Information on page 151 of this Draft Prospectus.

35. The Objects of the Issue for which funds are being raised, are based on our management estimates and any bank or financial institution or any independent agency has not appraised the same. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titles "Objects of the Issue".

The fund requirement and deployment, as mentioned in the "Objects of the Issue" on page 67 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter Objects of the Issue is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated under chapter Objects of the Issue will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. Occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

36. There is no monitoring agency appointed by our Company and the deployments of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above Rs. 10,000 Lakh. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the Audit Committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

37. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details regarding our dividend policy, please see–Dividend Policy on page no. 150 of this Draft Prospectus.

38. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

39. Delay in raising funds from the IPO could adversely impact the implementation schedule.

The proposed use of issue proceeds, as detailed in the section titled Objects of the Issue on page no. 67 is to be partially and/or wholly funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute the expansion process within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

40. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be

diverted from other business concerns, which could have an adverse effect on our business and operations.

There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

41. We cannot assure you that our equity shares will be listed on the NSE Emerge in a timely manner or at all, which may restrict your ability to dispose of the equity shares.

Though we shall make best of our efforts to comply with all applicable regulatory, financial and operational requirements for getting the equity shares proposed to be offered through this Draft prospectus listed on NSE emerge platform in a time bound manner, yet on account of any change in applicable laws, economic conditions and/or any other reason/s beyond our control, the said shares may not get listed on the Emerge platform of NSE Limited in a timely manner or at all, which may restrict your ability to dispose of the equity shares. However, even in such circumstances, the company shall stay fully committed to pay such interest and/or refund the full application amount, as may be required in accordance with the applicable regulatory directives.

42. Sale of Equity Shares by our Promoters or other significant shareholder(s) or any future issue of Equity Shares may dilute your shareholding and adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, or any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

43. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted consumers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

44. We operate in highly competitive markets and our inability to compete effectively may lead to lower market share or reduced operating margins, and adversely affect our results of operations.

India is our primary market and we face high competition in our business from local as well as nationwide players in our industry. Our key products are available from a large number of players providing same or similar products in our industry. Thus, factors affecting our competitive success include, amongst other things, price, demand for our product and/or services, brand recognition and reliability. As a result, to remain competitive in our market, we must continuously strive to reduce our procurement and administrative costs and improve our operating efficiencies. If we fail to do so, our competitors may be able to provide their products at prices lower than our prices, which would have an adverse effect on our market share and results of operations. Our competitors vary in size, and may have better financial, marketing personnel and other resources than us and certain of our competitors have a longer history of established business and reputation

in the Indian market as compared with us. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our services, which may result in a decline in our revenues and profitability.

45. Fluctuations in prices of raw material and if we are unable to maintain appropriate time span between procurement and selling of our product it may cause huge losses.

Any fluctuation in the prices of raw material may affect our cost and supply of the services. Therefore, any significant increase in these prices due to any reasons, and our inability to pass on increased costs to our consumers or reduction in demand from our consumers, may adversely affect our revenue and profitability. For further details, see Our Business on page no. 89 of this Draft Prospectus.

46. Our operations could be adversely affected by disputes with employees.

We believe we maintain good relationships with our workforce, there can be no assurance that the Company will not experience future disruptions to its operations due to disputes or other problems with its work force.

47. Interest rate fluctuations may adversely affect the Company's business.

The Company may enter into certain borrowing arrangements to finance its capital requirements in the ordinary course of business in connection with potential acquisitions or for general working capital purposes. In the event interest rates increase, the Company's costs of borrowing will increase, and its profitability and results of operations may be adversely affected.

48. Industry information included in this Draft Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical financial and other industry information is either complete or accurate.

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Draft Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics.

Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Draft prospectus.

49. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Issue, we will be subject to a daily circuit breaker imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance can be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

50. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to our Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

51. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by fixed price method. This price is based on numerous factors (For further information, please refer chapter titled –Basis for Issue Price beginning on page 72 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation.

The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

REGULATORY RISK FACTORS

52. We are subject to environmental regulations and may be exposed to liability as a result of our handling of hazardous materials and potential costs for environmental compliance.

We are subject to Indian laws and regulations concerning the discharge of effluent water and solid particulate matter during our manufacturing processes. We are required to obtain certain clearances and authorizations from government authorities for the collection, treatment, storage and disposal of hazardous waste. For details of applicable regulations, please see “Key Regulations & Policies” on page 106 of this Draft Prospectus. The Government may take steps towards the adoption of more stringent environmental regulations and we cannot assure you that we will be at all times in full compliance with these regulatory requirements. These regulations can often require us to purchase and install expensive pollution control equipment or make operational changes to limit any adverse impact or potential adverse impact on the environment and any violation of these regulations may result in substantial fines, criminal sanctions, revocations of operating permits and/or shutdown of our facilities. Due to the possibility of unanticipated regulatory or other developments, the amount and timing of future environmental expenditures may vary substantially from those

53. We operate in a highly regulated environment and central and state government policies and regulations affecting the agricultural sector and related industries could adversely affect our operations and our profitability.

Several aspects of our operations, including the sourcing and pricing of raw material and the sale of our products are regulated by the central and state governments. Agricultural production and trade flows are significantly affected by government policies and regulations. Government policies affecting the agricultural industry, such as environmental regulations, taxes, tariffs, duties, subsidies and import and export restrictions on agricultural commodities and commodity products, can influence industry profitability, the planting of certain crops as opposed to other crops, the location and size of crop production, whether unprocessed or processed commodity products are traded, and the volume and types of imports and exports. Further, the price at which we procure sugar is set by the state government under the SAP mechanism. Future government policies in India and elsewhere may adversely affect the supply and demand for and prices of our products and raw materials, and restrict our ability to do business in our existing and target markets and could adversely affect our results of operations. For details of central government policies applicable to us, please see “Key Regulations & Policies” on page 106 of this Draft Prospectus.

54. Our ethanol business is highly dependent on Government policy.

Ethanol demand and price largely depend on Government policy towards cleaner fuels. The Government has targeted that Indian oil companies in 21 states and certain union territories blend up to 10% ethanol in gasoline. However, the ethanol blending limit is currently set at 5% by the Government of India (Cabinet Committee of Economic Affairs), and even that has not been achieved in the past. Further, Government policy may change. If Government regulations mandate oil companies to blend less ethanol in gasoline, the demand for ethanol may decrease which may adversely affect our ethanol operations and may have an adverse impact on our results of operations and our profitability.

- 55. *If we are not able to obtain, renew or maintain the permits and approvals required to operate our businesses, this may have a material adverse effect on our businesses.***

The success of our strategy to grow and optimise its existing operations in the various sectors in which we operate is contingent upon, among other factors, receipt of all required licenses, permits and authorisations, including environmental permits and health and safety permits. In the future, we may be required to renew such permits and approvals or to obtain new permits and approvals.

- 56. *If we fail to comply with environmental, employee-related or health and safety laws and regulations or any other local laws or regulations in the countries in which we operate, this may adversely affect our business and results of operations.***

As a manufacturing company, we are required to comply with various laws and regulations relating to the environment. Although we believe that we comply in all material respects with all applicable statutes and with the regulations thereunder, we may incur substantial costs to comply with requirements of environmental laws and regulations in the future.

Our sugar manufacturing, power generation and Ethanol projects are subject to, amongst other laws, environmental laws and regulations promulgated by the Ministry of Environment of the Government of India and State Pollution Control Boards. These include laws and regulations that limit the discharge of pollutants into the air and water and establish standards for the treatment, storage and disposal of hazardous waste materials. Environmental laws and regulations in India are not as extensive as they are in other countries, such as the United States. They have, however, been increasingly stringent and it is possible that they will become significantly more stringent in the future. If any of our facilities are shut down, we will continue to incur costs in complying with regulations, appealing any decision to stop construction and paying labour and other costs which continue even if production has ceased. As a result, our overall operating expenses may increase, adversely affecting our business and results of operations.

We are also subject to health and safety laws and regulations as well as laws and regulations governing our relationship with our employees in areas such as minimum wages, maximum working hours, overtime, working conditions, hiring and terminating employees, contract labour and work permits. Changes in laws or regulations in the countries in which we operate may result in our incurring significant costs in order to maintain compliance with such laws and regulations.

EXTERNAL RISK FACTORS

- 57. *Changes in the Government Policy could adversely affect economic conditions in India generally and our business in particular.***

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

- 58. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include

STT, GST, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. Imposition of any other taxes by the Central and the State Governments may adversely affect our results of operations.

59. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

60. You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months is not subject to capital gains tax in India if securities transaction tax (STT) is paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax. Any change in tax provisions may significantly impact your return on investments.

61. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

62. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Just over two years after COVID-19 caused the deepest global recession since World War II, the world economy is again in danger. This time it is facing high inflation and slow growth at the same time. Even if a global recession is averted, the pain of stagflation could persist for several years unless major supply increases are set in motion.

Amid the war in Ukraine, surging inflation, and rising interest rates, global economic growth is expected to slump in 2022. Several years of above-average inflation and below-average growth are now likely, with potentially destabilizing consequences for low- and middle-income economies. It's a phenomenon—stagflation—that the world has not seen since the 1970s.

The forecasts reflect a sizable downgrade to the outlook: global growth is expected to slow sharply from 5.7 percent in 2021 to 2.9 percent this year. This also reflects a nearly one-third cut to our January 2022 forecast for this year of 4.1 percent. The surge in energy and food prices, along with the supply and trade disruptions triggered by the war in Ukraine and the necessary interest rate normalization now underway, account for most of the downgrade.

COVID-19 already dealt a major setback to income growth and poverty reduction in developing economies. The fallout from the war in Ukraine compounds the challenges for many of them. They are expected to grow 3.4 percent in 2022—barely half the rate in 2021 and well below the average from 2011 through 2019. Middle-income countries will see a sharp downgrade to growth in 2022, losing 1.3 percentage points relative to the January forecast. Because of the adverse shocks of the past two years, real income per capita in 2023 will remain below pre-COVID-19 levels in about 40 percent of developing economies. For many countries, recession will be hard to avoid. With the supply of natural gas constrained, especially for use in fertilizer and electricity grids in poorer countries, announcements of major production increases worldwide will be essential for breaking out of stagflation and restoring noninflationary growth.

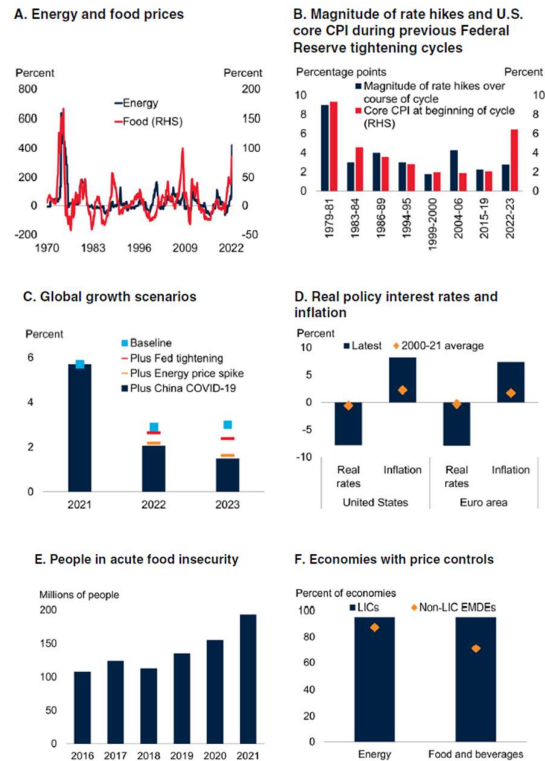

The danger of stagflation is considerable today. Between 2021 and 2024, global growth is projected to have slowed by 2.7 percentage points more than twice the deceleration between 1976 and 1979. Subdued growth will likely persist throughout the decade because of weak investment in most of the world. With inflation now running at multidecade highs in many countries and supply expected to grow slowly, there is a risk that inflation will remain higher for longer than currently anticipated. External public debt in developing economies is at record levels today. Most of it is owed to private creditors, and much of it involves variable interest rates that could spike suddenly. As global financing conditions tighten and currencies depreciate, debt distress previously confined to low-income economies is spreading to middle-income countries.

Global Risks and Policy changes

Surging energy and food prices heighten the risk of a prolonged period of global stagflation reminiscent of the 1970s. Broad-based inflationary pressures in the United States may precipitate more aggressive monetary tightening, potentially triggering financial stress in emerging market and developing economies (EMDEs). Global growth could be substantially weaker if key downside risks were to materialize. Despite central bank rate hikes, real rates remain low amid high inflation, suggesting that further policy tightening may be needed. To address rising food insecurity, EMDE policy makers can deploy targeted support rather than distortionary price controls, which are already widespread.

Global Context

Russia’s invasion of Ukraine the second major global shock in just over two years is exacerbating the global economic slowdown. It has worsened the strains in global supply chains and caused significant additional increases in the prices of many commodities, particularly those exported by Russia and Ukraine. This has contributed to a further acceleration of inflation in both advanced economies and EMDEs. Global financial conditions have tightened considerably, reflecting increases in monetary policy rates, greater volatility, and waning risk appetite.

Goods trade slowed in the first half of 2022 as supply chains continued to be affected by the lingering effects of the pandemic, including disruptions in major Asian ports and lockdowns in key cities in China. In addition, Russia’s invasion of Ukraine and its repercussions have led to severe physical and logistical dislocations that have magnified pre-existing bottlenecks.

Global trade growth is anticipated to slow to 4 percent in 2022 as the war in Ukraine further disrupts global value chains, global activity gradually shifts back toward the less trade intensive services sector, and international mobility moves toward pre-pandemic levels only gradually. This is a substantial downward revision relative to previous forecasts, largely because of higher transport costs and significant global value chain disruptions associated with the war.

Services trade has regained its pre-pandemic level, driven by a rebound in non-tourism services. While tourism activity has started to recover in advanced economies with high vaccination levels, it remains generally subdued in EMDEs, especially in tourism-reliant countries and in small states. The invasion is also weighing on tourism activity in countries that rely on tourists from Russia and Ukraine.

 B. Trade measured as the average of export and import volumes. January 2022 forecasts are from the January 2022 edition of *Global Economic Prospects* report.

Global Inflation

Inflation has accelerated in both advanced economies and EMDEs, reflecting firming demand; persistent supply disruptions; tight labor markets in some countries; and, especially, surging commodity prices, which have been pushed up further by the invasion. Global median headline CPI inflation rose to 7.8 percent (y/y) in April 2022, its highest level since 2008. Aggregate EMDE inflation reached over 9.4 percent its highest level since 2008 while inflation in advanced economies, at 6.9 percent, is the highest since 1982 (figure 1.5.A). The energy component of global consumer price inflation has risen sharply and is at its highest level since the early 1980s. In two-fifths of EMDEs and most low income countries (LICs), consumer food price inflation is expected to remain in double-digits this year.

While increases in food and energy prices have mainly driven the sharp rise in headline inflation, core inflation has also risen globally. In the first half of 2022, the housing, fuel, transport, and furnishing sectors contributed about two-thirds and two-fifths to total headline inflation in advanced economies and EMDEs, respectively. In particular, housing price inflation has been pronounced in advanced economies.

Financial Developments

Rising inflation has led to expectations of faster monetary policy tightening across the world. Advanced-economy bond yields have risen markedly, and measures of equity volatility have seen a sustained increase, weighing on valuations of risky assets. Since the beginning of the year, U.S. and euro area stocks have fallen about 13 percent and 12 percent, respectively.

The invasion of Ukraine is intensifying inflationary pressures. Inflation in many countries is reaching multidecade highs and is now above target in most advanced economies and emerging market and developing economies (EMDEs). Inflation expectations have also risen further.

The war triggered an initial appreciation of the U.S. dollar that was larger than those following the taper tantrum and previous geopolitical events.

B. Countries with inflation above target

C. Survey-based EMDE inflation expectations

D. Market-based five-year inflation expectations

E. Evolution of the U.S. dollar against EMDE currencies during select events

GLOBAL SUGAR INDUSTRY

Overview 2022-2023

Global production is forecast up 1.7 million tons to 182.9 million as higher production in Brazil, China, and Russia is expected to more than offset declines in India and Ukraine. Consumption is anticipated to rise to a new record due to growth in markets including China, India, Indonesia, and Russia. Exports are projected down as the drop in India more than offsets higher exports from Brazil and Thailand. Stocks are forecast lower as growth in global consumption exceeds the rise in production. China is forecast to import less in favor of drawing down stocks for its consumption. Thailand is expected to draw down stocks in the face of strong global demand.

U.S. production is forecast down 2 percent to 8.2 million tons on lower forecast sugarbeet yields relative to 2021/22. Imports are down 13 percent to 2.7 million tons based on projected quota programs set at minimum levels consistent with World Trade Organization and Free-Trade Agreement obligations and on projected imports from Mexico, re-export imports, and high-tier tariff imports. Consumption is unchanged while stocks are lowered with the drop in production and imports.

Brazil production is forecast up 1.0 million tons to 36.4 million as higher sugarcane yields from favorable weather are expected to result in additional sugarcane available for crushing. Harvested area is lowered as marginal sugarcane areas switch to soybeans and corn. The sugar/ethanol production mix is expected to be unchanged relative to the previous season at 45 percent sugar and 55 percent ethanol. The current conflict in Ukraine has brought no significant impact to the current sugarcane crop, given that fertilizer purchases and use occurred beforehand. Consumption is unchanged and stocks down, while exports are projected to rise with higher exportable supplies.

India production is forecast to decline 3 percent to 35.8 million tons as less sugarcane is processed for sugar. Consumption is anticipated at a record high with the expectation of continued favorable retail and institutional sugar demand. Imports are unchanged while exports are expected to decline by over 40 percent given the expected return to normal trade volumes. Record exports are estimated for 2021/22 following global supply shortfalls. On May 24, 2022, the Ministry of Commerce and Industry, through the Directorate General of Foreign Trade announced an amendment to its sugar export policy. Amid overseas sales, India issued a notification curbing exports of sugar to check domestic inflation and to channel more sugarcane into ethanol production.

According to the amendment, exports of raw, refined, and white sugar have been placed under the “restricted” category. Exports occurring after June 1, 2022 will require special permission from the Directorate of Sugar, under the Department of Food and Public Distribution. Sugar exports destined for the United States and the European Union under its tariff-rate quota and Schedule CXL quotas, respectively, are exempted from this directive. This is the first restriction on sugar exports in 6 years. Stocks are up almost 15 percent with the expected lower exports.

Pakistan production is forecast up marginally to 7.2 million tons due to slight increases in area and sugarcane yields. Consumption continues to grow with population and demand from the expanding food processing sector. Exports are forecast to double on expectations of larger exportable supplies. Despite higher production, stocks are projected to be up slightly with the surging exports.

Mexico production is forecast down slightly to 6.4 million tons. Consumption is expected to be flat while stocks are unchanged, and exports are projected to be higher. Exports to the United States will be limited by the level of U.S. Needs as defined in the amended Suspension Agreements.

Australia production is forecast up 330,000 tons to 4.5 million due to an expected rise in sugarcane crush. The increase in production is driven by anticipated improvements in sugar cane yields, mainly in the northern tropical regions of Queensland which have experienced improved crop growth conditions for the first 9 months of the season. Consumption, exports, and stocks are all higher with the rise in production. Around 80 percent of Australian sugar is exported, with around 90 percent expected to go to Indonesia, Japan, and South Korea.

Egypt production is up 70,000 tons to 2.9 million on higher sugarbeet area. The rise in area is attributed to the establishment of new sugarbeet processing plants. Consumption is up with population growth and expansion of the confectionary food products sector. Imports are expected to remain unchanged as demand is met by higher output.

Guatemala production is forecast flat at 2.6 million tons. Consumption and exports are up slightly while stocks are down as a result of the higher consumption and exports. Indonesia production is forecast up 4 percent to 2.4 million tons due to favorable rain and higher area and sugarcane yields. Consumption is expected to be up mainly due to higher sugar demand from the growing food and beverage industry and population growth. Imports are up, despite higher production, to meet consumption while stocks are expected down.

Turkey production is forecast 300,000 tons higher to 3.1 million due to favorable weather and slightly higher area. Consumption is flat, while exports and stocks are raised with the higher available supplies.

Colombia production, consumption, and imports are each forecast unchanged with production at 2.3 million tons. Exports are up slightly, drawing down stocks.

Russia production is projected up 500,000 tons to 6.5 million with expected higher yields. Consumption, exports, and stocks are each up with the higher supplies.

Ukraine production is forecast down 23 percent to 1.1 million tons due to sub-optimal conditions in growing regions before and during the period when sugar beets are planted. Production is also affected by reduced area as a result of current or past military activities, including labor availability, unexploded munitions, and minefields. Consumption is up based on assumptions for population, refugees, and economic activity. Exports and stocks are expected to drop due to the lower available supplies.

Selected MY 2021/22 Revisions from November 2021 Forecast:

1. Global production is up slightly to 181.2 million tons.
 - India is up 2.1 million tons to 8.4 million due to favorable weather and higher yields.
 - Pakistan is up 465,000 tons to 7.1 million on greater area.
 - Russia is down 550,000 tons to 6.0 million due to poor yields and extraction rate.
 - Brazil dropped 650,000 tons to 35.4 million as unfavorable dry weather and a freeze lowered sugarcane yields.
 - China fell 700,000 tons to 9.6 million due to unfavorable weather, lower yields, and competition with other crops such as corn.

2. Global imports are down 2.0 million tons to 56.3 million.
 - Ethiopia nearly quadrupled to 1.7 million tons on a trade data source change.
 - Indonesia is raised 15 percent to 5.5 million tons on revised trade data.
 - United States is raised 385,000 tons on higher imports from Mexico and TRQ reallocations.
 - China is lowered 500,000 tons due to high world prices and COVID-related logistics issues.
 - Global exports are down 1.1 million tons to 64.3 million.
 - India is raised 1.8 million tons to 8.8 million due to record exports following global supply shortfalls and competitive prices.
 - Brazil falls 350,000 tons to 25.7 million on reduced exportable supplies.

3. Global ending stocks are up 3.2 million tons to 48.9 million.
 - Indonesia rises 1.2 million tons to 2.5 million as revised import data for the prior year raises beginning stocks.
 - Pakistan is up 922,000 tons to 3.5 million on higher production from greater area.
 - Thailand is raised 571,000 tons to 6.9 million on greater production and beginning stocks.
 - EU climbs 412,000 tons to 1.8 million as production and imports were revised higher for the previous year.
 - China drops 339,000 tons to 3.9 million on lower production and imports.

Sugar Industry

Sugar industry is an important agro-based industry that impacts rural livelihood of about 50 million sugarcane farmers and around 5 lakh workers directly employed in sugar mills. Employment is also generated in various ancillary activities relating to transport, trade servicing of machinery and supply of agriculture inputs. India is the second largest producer of sugar in the world after Brazil and is also the largest consumer. Today Indian sugar industry's annual output is worth approximately Rs.80,000 crores. There are 732 installed sugar factories in the country as on 31.07.2017, with sufficient crushing capacity to produce around 339 lakh MT of sugar. The capacity is roughly distributed equally between private sector units and cooperative sector units.

The cane price announced by the Central Government is decided on the basis of the recommendations of the Commission for Agricultural Costs and Prices (CACPC) after consulting the State Governments and associations of sugar industry. The amended provisions of the Sugarcane (Control) Order, 1966 provides for fixation of FRP of sugarcane having regard to the following factors:-

1. cost of production of sugarcane;
2. return to the growers from alternative crops and the general trend of prices of agricultural commodities;

3. availability of sugar to consumers at a fair price;
4. price at which sugar produced from sugarcane is sold by sugar producers;
5. recovery of sugar from sugarcane;
6. *the realization made from sale of by-products viz. molasses, bagasse and press mud or their imputed value;
7. **reasonable margins for the growers of sugarcane on account of risk and profits

Ethanol Industry

India's net import of petroleum was 185 Mt at a cost of US \$ 551 billion in 2020-21. Most of the petroleum products are used in transportation. Hence, a successful E20 program can save the country US \$4 billion per annum, i.e. Rs. 30,000 cr. Besides, ethanol is a less polluting fuel, and offers equivalent efficiency at lower cost than petrol. With the recently approved interest subvention incentives for grain based distilleries, the target of 20% blending of petrol in the country by 2025 thus appears feasible and within reach. Oil Marketing Companies have prepared their plans for phased rollout, and vehicle manufacturers have assured of making a similar plan once the intention of the government with timelines is publicly declared. What is left is smoothing of some regulatory stipulations to provide single window service for setting of new ethanol distilleries and to ease interstate movement of denatured ethanol.

The Government of India notified the National Policy on Biofuels –2018 (NPB–2018) on 4.06.2018 wherein, under the Ethanol Blended Petrol (EBP) Program, an indicative target of 20% blending of ethanol in petrol by 2030 was laid out.

* The petrol projections may undergo revision due various factors like penetration of EVs, etc.

** The figures are optimistic, as the E20 fuel will be consumed by new vehicles from April 2023 only. The demand for ethanol will, however, increase due to penetration of E100 two wheelers, which are now being manufactured in the country.

During the meeting of Committee of Secretaries on 13.11.2020, DFPD informed that the fuel 20% ethanol requirement by 2025 will be met from sugar as well as grain sectors.

Ethanol Production Projections

We, hereby conclude that sugar continues to be the most lucrative food crop for ethanol even though it has the highest water consumption per acre. Amongst grains, maize is the least water-intensive crop for ethanol production, although the litre of ethanol generated per acre is lower than rice and broken rice. We must continue to explore the feasibility of other grains which can supplement sugar in ethanol production to meet the 2025 targets

Our promoter, Mr. Mehmood Khan possess rich experience of sugar industry of nearly about fifteen years. In 2006, Mr. Mehmood Khan, one of our promoter, participated in a tender floated by Govt. of Maharashtra for a sugar unit on lease at Nanded, Maharashtra and was allotted the unit for a period of 6 years. After getting rich experience in sugar industry, he started mentoring other companies engaged in sugar manufacturing. Thereafter, he decided to set up a sugar manufacturing plant, in the name of the company ‘Dollex Industries Limited’ (BSE listed company) which was later on merged with an unlisted company, ‘Parvati Sweetners and Power Ltd’, in 2018, and our promoters sold their shareholding in that Company & currently has no control neither by shareholding nor by any managerial rights.

Further, in year 2017, Mr. Mehmood Khan has decided to set-up sugar manufacturing plant & commenced its operations in 2018, of Sugar manufacturing, from sugarcane along with co-generation capabilities in Indore, Madhya Pradesh. Our plant is situated at Village Erai, Tehsil Badoni Khurd, Dist. Datia, Madhya Pradesh- 475686 have crushing capacity of 2500 TCD. We have received in-principle approval from department of Food & public distribution from Government of India for establishing distilleries of 200 KLPD capacity. OUR PRODUCTS

<p>1</p>	<p>Jaggery powder</p> <p>Jaggery is an unrefined sugar product. It's sometimes referred to as a "non-centrifugal sugar," because it's not spun during processing to remove the nutritious molasses. About 70% of the world's jaggery production takes place in India, where it is commonly called "gur." We, in our plant produce jaggery powder as one of our primary product.</p>	
<p>2</p>	<p>Sugar</p> <p>Sugar is physically extracted from liquid jaggery. Sugar is considered as whole food that provides necessary vitamins and fiber and is very essential food item in every Indian household. We, in our plant produce two types:</p> <p>1. Refined Sugar It is refined and washed so that it has a white appearance and no molasses flavour. It contains 99.9% sucrose. This type of sugar is widely used in households.</p> <p>2. Pharma-grade Sugar This is the more pure form of sugar. It is mainly used in preparation of pharmaceutical and food products.</p>	
<p>3</p>	<p>By-Products</p> <p>Molasses and bagasse are a by-product of the sugar industry.</p> <p>1. Molasses Every ton of processed cane will lead to the production of molasses, the by-product from which no additional sugar can be obtained by further crystallisation. Molasses still contains a substantial amount of sugar.</p> <p>2. Bagasse Bagasse are used in captive plant for power generation.</p>	
<p>4</p>	<p>Press mud</p> <p>Sugarcane press mud is the solid residue produced after filtration of sugarcane juice. It is also called sugarcane filter press mud. It can be used as a bio manure in agricultural activities.</p>

MANUFACTURING PROCESS

HARVESTING
 Sugarcanes are harvested from fields by farmers, and we buy them at MSP prescribed by government, then the cane are weighed.

INITIAL PREPARATION
 The canes are crushed into smaller pieces to extract their juice.

EXTRACTING JUICE
 The cane passes through five or more millers to compress cane fibre and the extracted juice is diverted away from bagasse.

TESTING CONCENTRATION OF SUGAR
 To check level of sugar concentration, the sample of juice is tested. After which, it is further sent to processing.

PURIFICATION OF JUICE
 The juice flows from a 10 m high tower and sulphur dioxide vapours rises from it, which bleaches the juice and its ph level is measured. Then powdered lime is added and mixed for about 6 hours, which is alkalisation. It clarifies the juice and colour of juice changes from brown to yellow. After that, sludge deposits on base of tank and juice floats over. Further, it is boiled in vacuum evaporators until it reaches a concentration of 50%–60% sugar. For more clarification, the juice is skimmed and sediments float on top and are removed by floating out of tank.

CRYSTALLIZATION
 In the serum left, milky solution of sucrose is added, and it is again boiled in a large tank to form crystals. The water evaporates and sugar crystals continue to grow into a paste called massecuite, a dense mixture of syrup and sugar crystals. The massecuite is slowly stirred and cooled, continuing the crystallization process.

CENTRIFUGATION
 To separate the massecuite into sugar crystals and molasses, the massecuite is added to a high-speed centrifuge. The centrifuge, which rotates at 1,000 to 2,800 revolutions per minute, contains a perforated metal cylindrical basket. During centrifugation, the molasses passes out of the lined centrifuge basket and is drawn to the outside of the centrifuge where it is removed and sent to storage tanks. The sugar is retained in the lined centrifuge basket. Spring water is used to wash the crystals as they are centrifuged.

DRYING AND PACKING
 The damp sugar crystals are dried in large, hot air dryers, reaching a moisture content of as low as 0.02%. The dried crystals are then separated into different sizes through vibrating screens and placed into storage bins.

QUALITY CHECK

Sugar is tested in many ways to validate its quality. These tests are according to a standard set of quality parameters that are important in demonstrating to potential buyers if the sugar meets the required standard. The following quality control measures consider the purity, colour and texture of the sugar.

1. Sugar quality: Polarisation

Polarisation (pol) measures the purity of the sugar, with the sucrose content of the sugar provided as a mass percentage. It is the main standard that is used to determine the quality of the sugar. The higher the polarisation, the purer the sugar is; the lesser the polarisation, the more impurities are present in the sugar.

2. Sugar quality: ICUMSA colour measurement

Another way that sugar quality is measured is through 'colour'. The term colour refers to a wide range of complex and molecular components that contribute to the overall appearance of sugar. Different colourants respond differently to the refining process, which is why colour is an important differentiating process when refineries are purchasing raw sugar that they want to turn into refined sugar.

3. Sugar quality: ash

Ash refers to all the inorganic components that are naturally present in the cane or beet. It is present in cane juice, and is carried over in a smaller amount into raw sugar. Ash is made up of both soluble and insoluble compounds and can be determined by the conductivity of the solution. If there is a high ash content in raw sugar, higher refining costs will be incurred as it will take longer to purify and there will be less yield.

4. Sugar quality: moisture

Reducing moisture in sugar is very important, as sugar is hygroscopic (meaning it absorbs moisture from the air) and can 'cake' if it becomes too moist. Caking occurs when sugar becomes too moist, and the granules become solidified.

FUTURE BUSINESS PLAN

The Ministry of Petroleum and Natural Gas in its policy, "National Policy in Biofuels-2018" dated June 4, 2022 has emphasised the usage of biofuels which are derived from renewable biomass resources. Government has undertaken multiple interventions to promote biofuels in the Country through structured programmes like Ethanol Blended Petrol Programme, National Biodiesel Mission, Biodiesel Blending.

The **Goal of the Policy** is to enable availability of biofuels in the market thereby increasing its blending percentage. Currently the ethanol blending percentage in petrol is around 10.00% and biodiesel blending percentage in diesel is less than 0.1%. An indicative target of 20% blending of ethanol in petrol and 5% blending of biodiesel in diesel is proposed by 2025. This goal is to be achieved by:

- a. reinforcing ongoing ethanol/biodiesel supplies through increasing domestic production
- b. setting up Second Generation (2G) bio refineries
- c. development of new feedstock for biofuels
- d. development of new technologies for conversion to biofuels.
- e. creating suitable environment for biofuels and its integration with the main fuels.

Thus, Government is adopting a multi-pronged approach to promote and encourage use of biofuels by Blending ethanol in petrol through Ethanol Blended Petrol (EBP) Programme using ethanol derived from multiple feedstocks

- a. Development of Second Generation (2G) ethanol technologies and its commercialization
- b. Blending biodiesel in diesel through Biodiesel Blending Programme exploring multiple feedstocks
- c. including straight vegetable oil in stationery, low RPM engines
- d. Focus on drop-in fuels produced from MSW, industrial wastes, biomass etc.
- e. Focus on advanced biofuels including bio-CNG, bio-methanol, DME, bio-hydrogen, bio-jet fuel etc.

The potential domestic raw materials for production of biofuels in the Country are sugarcane residue B-Molasses, Sugarcane juice, biomass in form of grasses, agriculture residues (Rice straw, cotton stalk, corn cobs, saw dust, bagasse etc.), sugar containing materials like sugar beet, sweet sorghum, etc. and starch containing materials such as corn, cassava, rotten potatoes etc., Damaged food grains like wheat, broken rice etc. which are unfit for human consumption, Food grains during surplus phase. Algal feedstock and cultivation of sea weeds can also be a potential feedstock for ethanol production.

The policy will allow production of ethanol from B Molasses as well as directly from sugarcane juice.

Niti Aayog in its report describing roadmap for **Ethanol Blending in India 2020-25** has raised the issue of our increasing dependence on fossil fuels bases fuels to be shifted to biofuels.

With a view to give a boost to the agriculture sector and to reduce environmental pollution, the government of India had launched pilot projects in 2001 wherein, 5% ethanol blended petrol was supplied to retail outlets. Apart from field trials, R&D studies were also simultaneously conducted.

Based on these promising experiences, the MoP&NG vide its notification dated 20th September, 2006 extended the 5% Ethanol Blended Petrol to twenty States and four UTs of the country with effect from 1st November, 2006. Public Sector Oil Marketing Companies (OMCs) were asked to sell 5% ethanol blended petrol subject to commercial viability as per Bureau of Indian Standards (BIS) specifications in the notified states and UTs.

From the inception of the EBP Programme, various pricing models have been adopted by the government which were based on the prevailing macro-economic situation of the sugar industry and the oil sector. The ethanol procurement gained momentum after the introduction of Administered Pricing Mechanism for Ethanol from ESY 2014-15.

We have also entered into an agreement with Bharat Petroleum Corporation Limited (BPCL), Indian Oil Corporation Limited (IOCL), Hindustan Petroleum Corporation Limited (HPCL) for Ethanol production under EBP Program, the details of which are given under ‘Collaboration’ in the Chapter ‘Our Business’ beginning on page no. 89.

Ethanol is a cleaner fuel than gasoline. Industrial alcohol production offers better realisations than molasses at current pricing. Therefore, it is advantageous for us to convert the large quantity of molasses we generate into industrial alcohol and other chemicals, rather than sell it directly. Ethanol or ethyl alcohol is produced through a natural process when the yeast converts the sugar contained in fruit, cereals and sugarcane, into alcohol. Pure alcohol is a colourless, pure liquid. The process used for its preparation is called fermentation.

The list of plant and machinery for the new set up for Ethanol Production are given as follows.

UTILITIES & INFRASTRUCTURE FACILITIES

Power

The bagasse generated as a part of the manufacturing process can be optimally utilized for power generation. The requirement of power during the crushing season is met through captive bagasse based co-generation. Cogeneration using bagasse is environment friendly as against the conventional thermal power plants which contribute to a great extent in emission of green house gases into the atmosphere. The necessity of reduction of emissions of green house gases presents a new market based on Carbon Credit Mechanism that may generate an additional financial inflow in future. We have a units of 3 MW. However, for off season requirement we, further get power supply from MPERC.

Water

Water required for human consumption and other purposes is fully met at the existing premises by internal supply & also with private supply. Also, for manufacturing process, we use ground water and a river nearby.

COMPETITION

India is one of the largest sugar producer in the world. There are a lot of competition in sugar production. Though our direct sugar competitors are the sugar mills operating out of Karnataka, Maharashtra and Uttar Pradesh, with the de-regulation of sugar prices, we now have to set sugar prices as per national competition. The competition faced by us is also in the form of sugarcane purchase from farmers from villages in our vicinity and also outside the area of our factory. Further, competition in the sugar industry arises from organised as well as from un-organised sector.

Our primary competition in the integrated sugar sector are Bajaj Hindusthan Limited, Dwarikesh Sugar Industries Limited and Triveni Engineering & Industries Ltd, Dhampur Sugar, Parvati Sweetners and Power Limited amongst others. We currently do not face any significant competition from international sugar producers in the Indian sugar market because there are limited imports of plantation white sugar in India due to high freight costs and import tariffs imposed by the Indian Government when domestic sugar supplies are sufficient to meet demand for sugar in India

OUR BUSINESS STRATEGY

Agriculture is the backbone of Indian economy. Sugarcane is one of the essential produce in the Indian market. Sugar industry is an important agro-based industry that impacts rural livelihood of about 50 million sugarcane farmers and around 5 lakh workers directly employed in sugar mills. Today Indian sugar industry’s annual output is worth approximately Rs.80,000 crores.

Enhance customer base by entering new geographies

We intend to cater to the increasing demand of our existing customers and also to increase our existing customer base by enhancing the distribution reach of our products. Enhancing our presence in additional regions will enable us to reach out to a larger market. Further, our Company believes in maintaining long term relationships with our customers. We aim to achieve this by maintaining the high quality, timely delivery, competitive pricing and reliability of our products.

Leveraging our Market skills and Relationships

This is a continuous process in our organization. We aim to enhance the growth by leveraging our relationships and further enhancing customer satisfaction. We plan to increase our customers by increasing the product & geographical base, maintaining our client relationship and renewing our relationship with existing buyers.

Our current working capacity enables us to capitalise future pricing trends

We are currently expanding our sugarcane manufacturing capacity and will continue to do in future, which will make us highest sugar pricing company in India. If we improve the yield of sugarcane in our reserved area, we are in a position to produce higher volumes of sugar, without further capital expenditure, which puts us at an advantageous position to benefit from any upward demand and price trend in the Indian sugar cycle.

Farmer education to increase yield

To incentivise sugarcane planting and protect the sugarcane acreage in our reserve areas, we have in the past, and shall continue to, remunerate the farmers in a timely manner. However, our ability to procure sugarcane is restricted to the reserve areas in which we operate. As a result, we seek to make optimum utilisation of the sugarcane procured from the farmers within our reserved areas. To facilitate cane increase in yield, we seek to educate the farmers in our reserved area and equip them with modern agricultural techniques.

PROPERTY RELATED LAWS

Transfer of Property Act, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer of property by operation of law, is governed by the Transfer of Property Act, 1882. This Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. The Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: the transfer of ownership in property for a price paid or promised to be paid.
- Mortgage: the transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The Act recognizes several forms of mortgages over a property.
- Charges: transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- Leases: the transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.

Registration Act, 1908 (The “Registration Act”)

The Registration Act has been enacted with the objective of providing public notice of the execution of documents affecting, inter alia, the transfer of interest in immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title and publication of documents and prevention of fraud. It details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in any immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. A document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the TP Act or as collateral), unless it has been registered. Evidence of registration is normally available through an inspection of the relevant land records, which usually contains details of the registered property. Further, registration of a document does not guarantee title of land.

The Indian Stamp Act, 1899

Stamp duty is payable on all instruments/ documents evidencing a transfer or creation or extinguishment of any right, title or interest in immovable property. The Indian Stamp Act, 1899 (the –Stamp Act) provides for the imposition of stamp duty at the specified rates on instruments listed in Schedule I of the Stamp Act. However, under the Constitution of India, the states are also empowered to prescribe or alter the stamp duty payable on such documents executed within the state. Instruments chargeable to duty under the Stamp Act but which have not been duly stamped, are incapable of being admitted in court as evidence of the transaction contained therein. The Stamp Act also provides for impounding of instruments by certain specified authorities and bodies and imposition of penalties, for instruments which are not sufficiently stamped or not stamped at all Instruments which have not been properly stamped instruments can be validated by paying a penalty of up to 10 times of the total duty payable on such instruments.

Indian Easements Act, 1882 (The “Easement Act”)

An easement is a right which the owner or occupier of land possesses for the beneficial enjoyment of that land and which permits him to do or to prevent something from being done, in or upon, other land not his own. Under the Easements Act, a license is defined as a right to use property without any interest in favour of the licensee. While aiming to cause least disturbance to land owners and other affected families, it contains provisions aimed at ensuring just and fair compensation to the affected families whose land has been acquired or is proposed to be acquired. It provides for rehabilitation and resettlement of such affected persons. Under the 2013 Land Acquisition Act, the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement (Maharashtra) Rules, 2014 have been notified which frame rules in relation to inter alia the consent process, the compensation mechanism and rehabilitation and resettlement.

The Real Estate (Regulation and Development) Act, 2016

This Act was notified by the Parliament on 25th March, 2016 and extends to the whole of India except the State of Jammu and Kashmir. It establishes the Real Estate Regulatory Authority for regulations and promotions of the real estate sector and to ensure sale of plot, apartment or building, as the case may be, or sale of real estate project, in an efficient and transparent manner and to protect the interest of consumers in the real estate sector and to establish an adjudicating mechanism for speedy dispute redressal and also to establish the Appellate Tribunal to hear appeals from the decisions, directions or orders of the Real Estate Regulatory Authority and the adjudicating officer and for matters connected therewith or incidental thereto. The salient features of the Act are as following:

- Under the Act, instead of a regular forum of consumers, the purchasers of real estate units from a developer would have a specialized forum called the "Real Estate Regulatory Authority" which will be setup within one year from the date of coming into force of the Act. In the interim, the appropriate Government (i.e., the Central or State Government) shall designate any other regulatory authority or any officer preferably the

Secretary of the department dealing with Housing, as the Regulatory Authority.

- The promoter has to register their project (residential as well as commercial) with the Regulatory Authority before booking, selling or offering apartments for sale in such projects. In case a project is to be promoted in phases, then each phase shall be considered as a standalone project, and the promoter shall obtain registration for each phase.
- Under the Act, developers can sell units only on carpet area, which means the net usable floor area of an apartment. This excludes the area covered by the external walls, areas under services shafts, exclusive balcony or verandah area and exclusive open terrace area, but includes the area covered by the internal partition walls of the apartment.
- The Act mandates that a promoter shall deposit 70% of the amount realised from the allottees, from time to time, in a separate account to be maintained in a scheduled bank. This is intended to cover the cost of construction and the land cost and the amount deposited shall be used only for the concerned project.
- Stringent penal provisions have been prescribed under the Act against the promoter in case of any contravention or non-compliance of the provisions of the Act or the orders, decisions or directions of the Regulatory Authority or the Appellate Tribunal which are the following: a) If promoter does not register its project with the Regulatory Authority – the penalty may be up to 10% of the estimated cost of the project as determined by the Regulatory Authority; b) If promoter does not comply with the aforesaid order of the Regulatory Authority - imprisonment of up to three years and a further penalty of up to 10% of the estimated cost, or both; and c) In case the promoter provides any false information while making an application to the Regulatory Authority or contravenes any other provision of the Act – the penalty may be up to 5% of the estimated cost of the project or construction.

STATE LAW

Urban Development Laws

State legislations provide for the planned development of urban areas and the establishment of regional and local development authorities charged with the responsibility of planning and development of urban areas within their jurisdiction. Real estate projects have to be planned and developed in conformity with the norms established in these laws and regulations made thereunder and require sanctions from the government departments and developmental authorities at various stages. For instance, in certain states such as Haryana, for developing a residential colony, a license is required from the relevant local authority. Where projects are undertaken on lands which form part of the approved layout plans and/or fall within municipal limits of a town, generally the building plans of the projects have to be approved by the concerned municipal or developmental authority. Building plans are required to be approved for each building within the project area. Clearances with respect to other aspects of development such as fire, civil aviation and pollution control are required from appropriate authorities depending on the nature, size and height of the projects. The approvals granted by the authorities generally prescribe a time limit for completion of the projects. These time limits are renewable upon payment of a prescribed fee. The regulations provide for obtaining a completion/occupancy certificate upon completion of the project.

Agricultural Development Laws

The acquisition of land is regulated by state land reform laws which prescribe limits up to which an entity may acquire agricultural land. Any transfer of land which results in the aggregate land holdings of the acquirer in the state exceeding this ceiling is void, and the surplus land is deemed, from the date of the transfer, to have been vested in the state government free of all encumbrances. When local authorities declare certain agricultural areas as earmarked for townships, lands are acquired by different entities. After obtaining a conversion certificate

from the appropriate authority with respect to a change in the use of the land from agricultural to non-agricultural for development into townships, commercial complexes etc., such ceilings are not applicable. While granting licenses for development of townships, the authorities generally levy development/ external development charges for provision of peripheral services. Such licenses require approvals of layout plans for development and building plans for construction activities. The licenses are transferable on permission of the appropriate authority. Similar to urban development laws, approvals of the layout plans and building plans, if applicable, need to be obtained.

ENVIRONMENTAL REGULATIONS

The Environment Protection Act, 1986 (“Environment Protection Act”)

The purpose of the Environment Protection Act is to act as an "umbrella" legislation designed to provide a frame work for Central government co-ordination of the activities of various central and state authorities established under previous laws. The Act prohibits persons carrying on business, operation or process from discharging or emitting any environmental pollutant in excess of such standards as may be prescribed. Where the discharge of any environmental pollutant in excess of the prescribed standards occurs or is apprehended to occur due to any accident or other unforeseen act, the person responsible for such discharge and the person in charge of the place at which such discharge occurs or is apprehended to occur is bound to prevent or mitigate the environmental pollution caused as a result of such discharge and should intimate the fact of such occurrence or apprehension of such occurrence; and (b) be bound, if called upon, to render all assistance, to such authorities or agencies as may be prescribed.

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened

by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance
- Enhancement of resources for Environmental Conservation

EMPLOYEE BENEFIT PLAN

(Amt in Lakh)

(A) Defined benefit Plan

The defined benefit plan operated by the Company is as below:

Retiring gratuity

The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump-sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 to 30 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. The Company does not make any contributions to gratuity funds and the plan is unfunded. The Company accounts for the liability for gratuity benefits payable in the future based on an actuarial valuation.

The defined benefit plans expose the Company to a number of actuarial risks as below:

(a) Investment risk: The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to Government Bonds Yield. If plan liability is funded and return on plan assets is below this rate, it will create a plan deficit.

(b) Interest risk: A decrease in the bond interstate (discount rate) will increase the plan liability.

(c) Mortality risk: The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants. For this report we have used Indian Assured Lives Mortality (2012-14) ultimate table.

(d) Salary risk: The present value of the defined benefit plan liability is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

The following table sets out the amounts recognized in the financial statements in respect of retiring gratuity plan:

The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.
